

#InvestEUresearch

# Horizon 2020 Work Programme for Research & Innovation 2018-2020

## The societal challenge 'Health, demographic change and well-being'

Philippe Cupers, Deputy Head of Unit  
Health research strategy Unit  
Health Directorate, European  
Commission

## What is Horizon 2020?

**HORIZON 2020** is the framework programme for research and innovation of the European Union

28 Member States +  
11 Associated Countries pooling  
resources in one unique  
R&I programme

# What do you need to know about Horizon 2020?

#1

European largest **integrated R&I programme**, from **basic research** to **close-to-market innovation**

Total budget (2014-2020) of ~ **EUR 77 billion** – this represents ~**10%** of **public R&I spending** in the EU  
~ 3,000 grants signed per year

**Horizon 2020** contributes to ~**90%** of the total **transnational research** funding in the EU  
(~75% of Horizon 2020 funding goes to transnational projects)

## What do you need to know about Horizon 2020?

**Excellence** as guiding principle for selection of projects

A large **toolbox of funding instruments** and actions

**Open to business:** from 2014 to 2016, **23.9% of funds go to Small and Mediums Enterprises (SMEs)**

**Open to international collaboration:** participation of 130 countries

## EU Horizon 2020: a three-pillar structure

- European Research Council
- Future and Emerging Technologies
- Marie Skłodowska-Curie actions
- Research infrastructures

SC1- Health, demographic changes and wellbeing (€ 7.4 b)

- Leadership in enabling and industrial technologies
- Access to risk finance
- Innovation in SMEs

# Horizon 2020 Work Programmes 2018-2020

## Political context

# Research and innovation – policy drivers (I)

## Contribution to 3 of the 10 Commission priorities

- Jobs, growth & investment
- Digital single market
- EU – a stronger global actor

# Research and innovation – policy drivers (II)

## SC1 policy drivers

- The 2030 Agenda for Sustainable Development and its Sustainable Development Goals
- Council Conclusions on Personalised Medicine and on Pharmaceuticals
- Digital Single Market
- COP21 and the goals of the Ostrava Declaration on Environment and Health
- The new European One Health Action Plan against Antimicrobial Resistance
- Cross-border healthcare directive (and its support to the European Reference Networks)
- Communication on upgrading the single market (and its proposed health technology assessments initiative)
- Building on the principle of openness – open science, open innovation and open to the world

# Key findings from the H2020 INTERIM EVALUATION

## KEY STRENGTHS

**An attractive, simplified and well-performing programme,** highly relevant for stakeholders and societal needs

On track to deliver **value for money** and **to meet its knowledge-creating objectives**

Strong **EU Added Value** through unique opportunities, competition & access to new knowledge

# Key findings from the H2020 INTERIM EVALUATION

## KEY AREAS FOR IMPROVEMENT

### **Underfunding**

Has lower success rates than FP7, esp. for high quality proposals

### **Support for market-creating innovation**

Demonstrates potential for breakthrough, market-creating innovation, but it should be strengthened substantially

### **Greater outreach to civil society**

Should better explain the impacts of R&I, and involve even more the users & citizens in agenda-setting & implementation

# EU Horizon 2020: supports health research from bench to bedside

Collaborative R&I projects

Public-Private Partnership with big Pharma

Public-Public Partnerships with EU Member States & beyond

MORE YEARS  
BETTER LIVES

Blue sky research

European Research Council

HORIZON2020  
Marie Skłodowska-Curie actions

Grants for small businesses

InnovFin  
Loans for small & large companies

Horizon Prize  
BIRTH DAY

Prizes

Education - R&D - Innovation

## Participant portal – one-stop shop

- Call topics + all related documents
- NCPs
- Expert registration
- Legal & guidance documents
- FAQs
- Access to proposal submission system

The screenshot shows the 'RESEARCH & INNOVATION Participant Portal' website. The header includes the European Commission logo and navigation links: HOME, FUNDING OPPORTUNITIES, HOW TO PARTICIPATE, EXPERTS, SUPPORT, and a search bar. A 'Horizon 2020 Funding' banner is prominent, stating 'Starting from 1/1/2014'. Below the banner, text indicates that users can find secure funding for projects under various EU programmes, including Horizon 2020, FP7, and several other programmes. The page is divided into sections for 'Non-registered users' (search for funding, read manuals, check registration status, contact support) and 'Registered users' (submit proposals, sign grants, manage projects, register as experts). At the bottom, there are six icons representing different portal functions: 'WHAT'S NEW?', 'FUNDING OPPORTUNITIES', 'HOW TO PARTICIPATE', 'WORK AS AN EXPERT', 'MY PERSONAL AREA', and 'INFORMATION AND SUPPORT'.

<http://ec.europa.eu/research/participants/portal>

**Collaborative  
research –  
Societal  
Challenge 1**

***'Health,  
demographic  
change and  
well-being'***

# What is health collaborative research?

## What are the requirements?

- Biannual work-programmes (with updates) published by EC
- Aims to foster collaboration between
  - ✓ Countries: minimum 3 legal entities from 3 different EU Member States or FP-associated countries
  - ✓ Sectors: pre-clinical, clinical, ...
  - ✓ Disciplines: cell biology, genetics, imaging, clinical trial, ...

## Broad range of topics ...

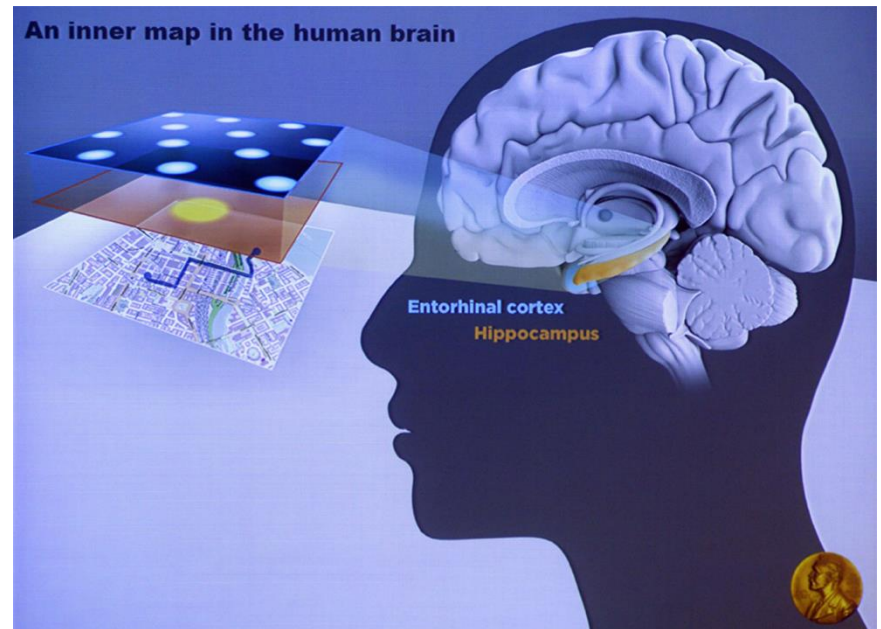

- *From ...* BHC-01-2019: Understanding causative mechanisms in co- and multimorbidities
- *To ...* HCO-05-2018: Strengthening regulatory sciences and supporting regulatory scientific advice

## EU-supported research: Brain research

### A positioning system in the brain

EU FP5 Life Sciences ('NAPPY') and FP7 Health ('SPACEBRAIN') collaborative research grants

& ERC grants

## EU-supported research: Regenerative medicine

theguardian

### Treating leukaemia with designer immune cells

### Baby girl is first in the world to be treated with 'designer immune cells'

Genetically engineered cells successfully used to treat aggressive form of childhood leukaemia, but landmark treatment had only been tested on mice

📷 Layla Richards, whose aggressive form of **leukaemia** was treated with genetically engineered immune cells. Photograph: Great Ormond Street Hospital/PA

A baby girl with aggressive leukaemia has become the first in the world to be treated with designer immune cells that were genetically engineered to wipe out her cancer.

## EU-supported research: Regenerative medicine

### Project "ESPOIR"

- Heart valve defect (2 in every 100 babies born): valve-replacement surgery very successful BUT limited immune tolerance in young patients, outgrow their valve, re-operations required every 5-10 years
- Implant a **decellularised human donor valve**: does not activate the immune system, and promotes tissue regeneration
- 121 patients treated: zero valve-related mortality - 83 % of patients free from any re-intervention or re-operation
- Obtained regulatory and reimbursement approval for decellularised human heart valves in DE, CH, NL, IT, UK, BE

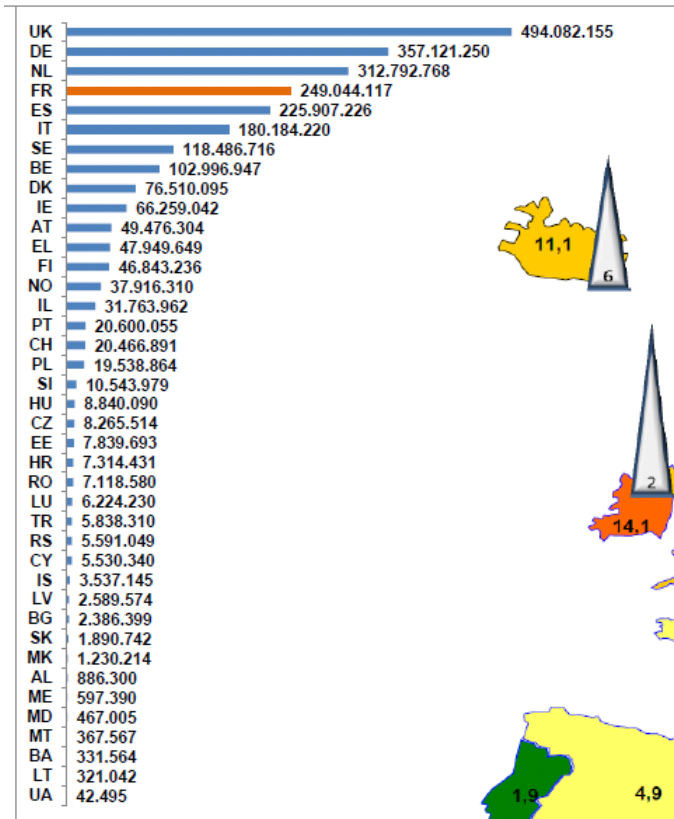

***New tissue growth***

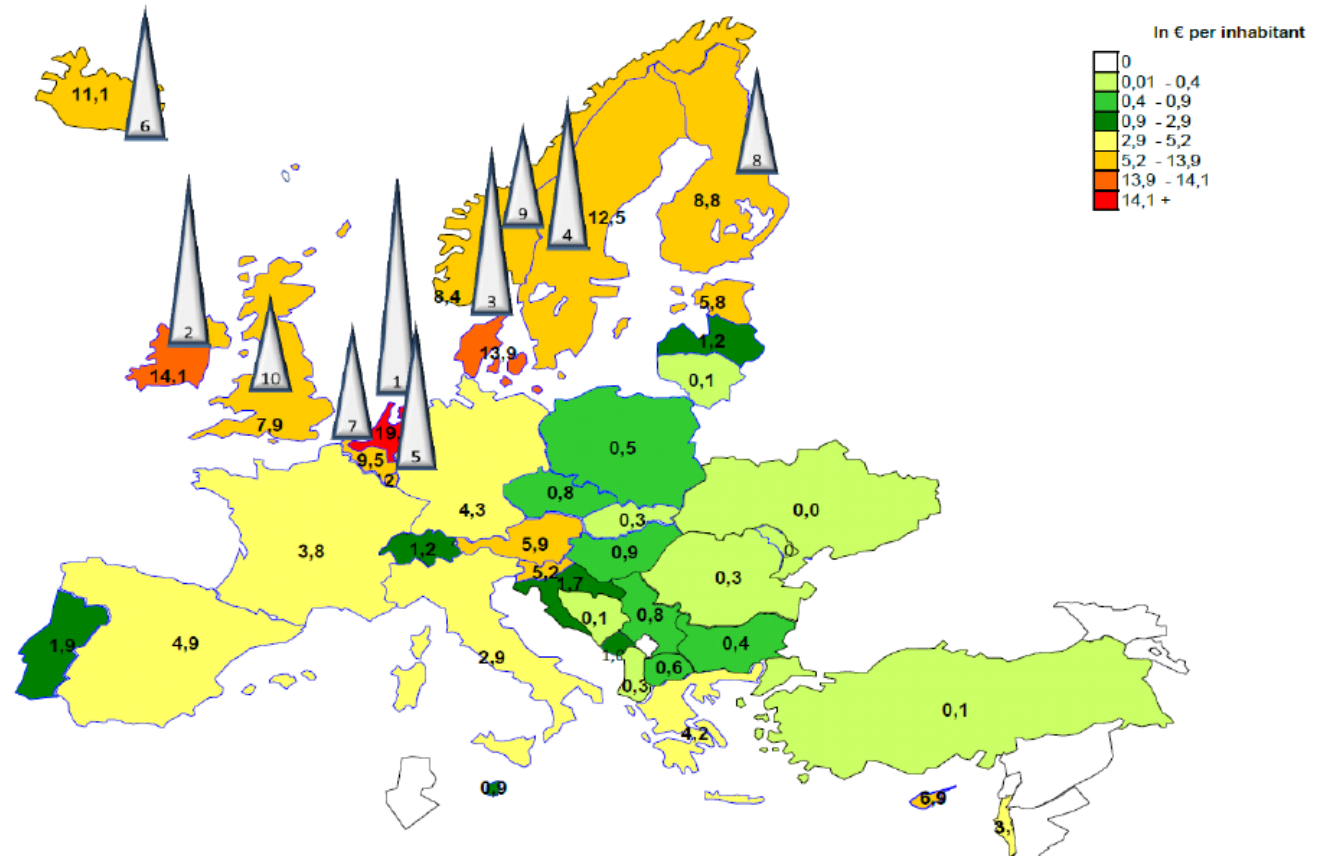

# What about France in H2020 SC1 ?

## EC contribution

## EU contribution by inhabitant

# Which FR region has received the most funding?

Regions	EU Contribution
FR10 - Île de France	169.343.154
FR71 - Rhône-Alpes	18.502.971

# Health collaborative research – 7 priorities for 2018–2020

## 1. Personalised medicine

## 2. Innovative health and care industry

## 3. Infectious diseases and improving global health

## 4. Innovative health, and care systems – Integration of care

## 6. Digital transformation in Health and Care

## 5. Decoding the role of the environment for health and well-being

## 7. Trusted Big Data solutions and Cybersecurity for Health and Care

# 7 priorities implemented via SC1 Work Programme 2018–2020 through 3 Calls for proposals

**Call 'Better Health and care, economic growth and sustainable health systems'**

5 main priorities & 32 topics

**Call 'Digital transformation in Health and Care'**

13 topics

**Call 'Trusted digital solutions and Cybersecurity in Health and Care'**

3 topics

**Other Actions 2018–2019**

7 items

approx.  
€ 2 billion

# Priority 1 – Personalised medicine

**AIM:** Delivering personalised health and care to benefit patients and citizens

**FOCUS:** complex disorders, human microbiome, rare diseases and data sharing for enabling personalised medicine, economic models, reinforcing international and regional collaboration

## **POLICY DRIVERS:**

[Council conclusions on Personalised Medicine](#)

[International Consortium on Personalised Medicine](#)

[European Reference Networks](#)

## Personalised Medicine in Work Programme 2018–2019 (I)

- BHC-03-2018: Exploiting research outcomes and application potential of the human microbiome for personalised prediction, prevention and treatment of disease
- BHC-04-2018: Rare Disease European Joint Programme Cofund
- BHC-05-2018: International flagship collaboration with Canada for human data storage, integration and sharing to enable personalised medicine approaches
- BHC-01-2019: Understanding causative mechanisms in co- and multimorbidities
- BHC-02-2019: Systems approaches for the discovery of combinatorial therapies for complex disorders

# Personalised Medicine in Work Programme 2018–2019 (II)

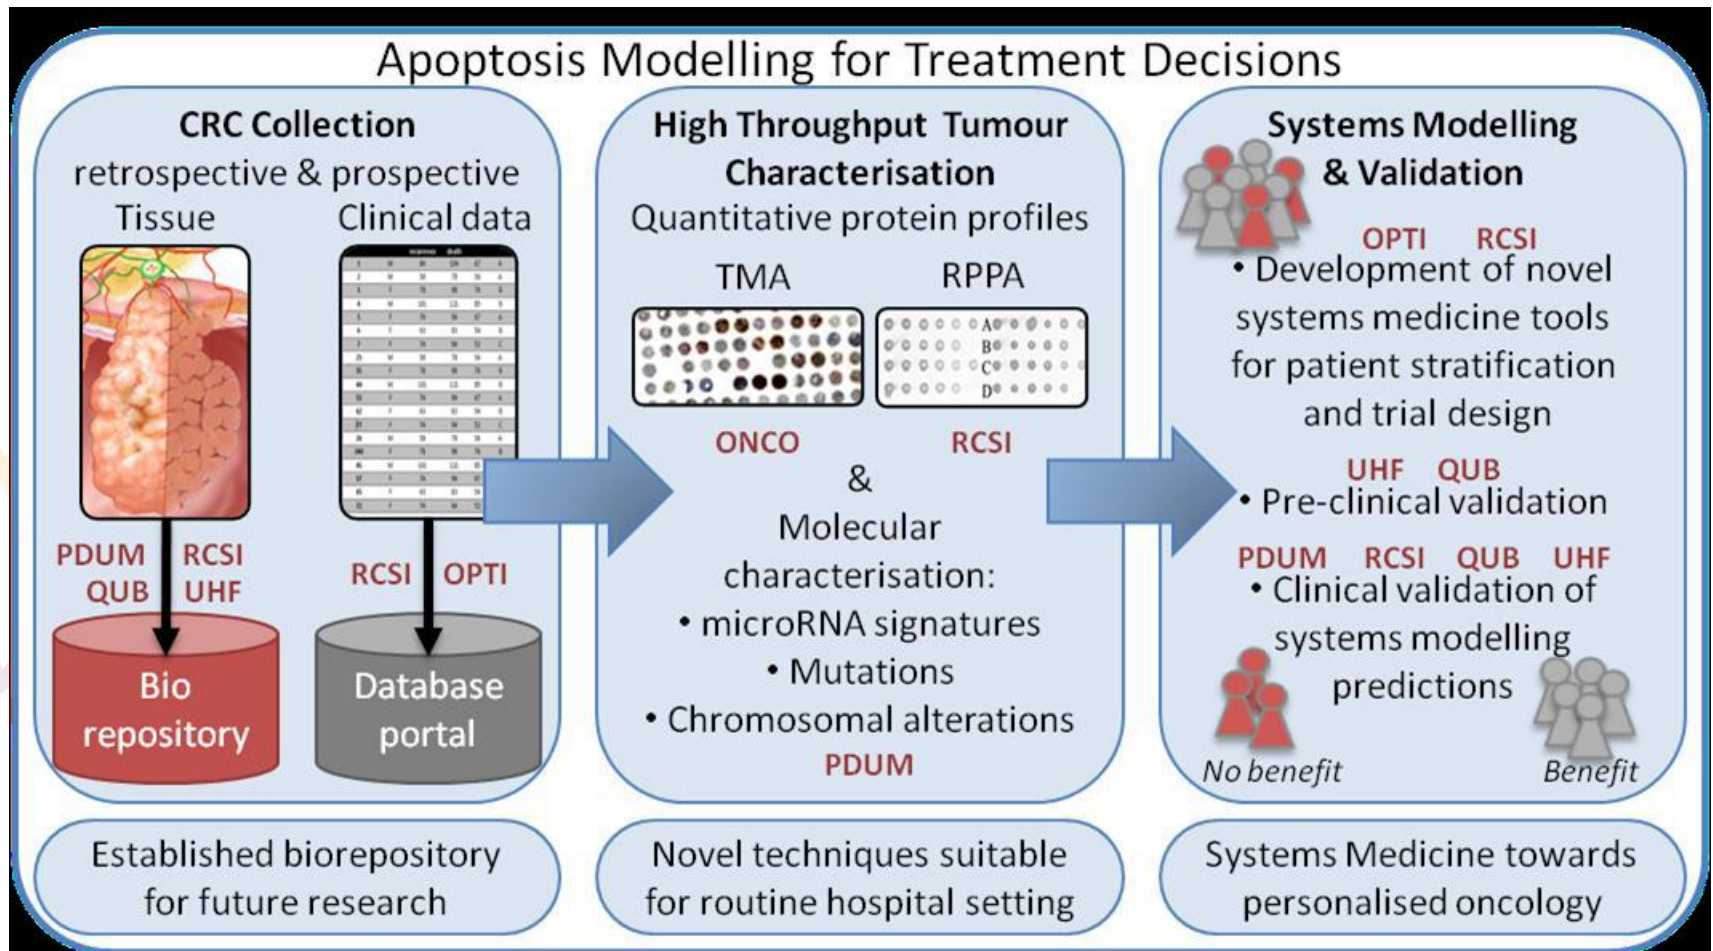

## Coordination and support actions

- HCO-02-2018: Data integration and data-driven in-silico models for enabling personalised medicine - a European standardization framework
- HCO-04-2018: ERA-NET to support the Joint Programming in Neurodegenerative Diseases strategic plan (JPND)
- HCO-01-2018-2019-2020: Actions in support of the International Consortium for Personalised Medicine

# EU-supported research: Treating colorectal cancer

## Project "APO-decide"

A systems-based modelling of apoptosis signalling pathways to deliver new prognostic and predictive biomarkers for advanced colorectal cancer

# EU-supported research: Pharmacogenomics for personalised medicine

EU project "U-PGx"

Patients tested for activity of many genes linked to drug actions

4000 patients + 4000 controls; 18 months

Data collected and embedded into e-records of patients in 7 countries

Doctors e-alerted when a drug is prescribed for a patient with "risky" genotype

Analysis of health outcomes and cost-effectiveness

**safety-code**  
The Medication Safety Code initiative

Name: Jane Doe  
Date of birth: 01.02.1934

Gene, status	Critical drug substances (modification recommended!)
CYP2C19 Poor metabolizer	Clopidogrel, Sertraline
CYP2D6 Ultrarapid metabolizer	Amitriptyline, Aripiprazole, Clomipramine, Codeine, Doxepin, Haloperidol, Imipramine, Metoprolol, Nortriptyline, Paroxetine, Propafenone, Risperidone, Tamoxifen, Tramadol, Venlafaxine
TPMT Poor metabolizer	Azathioprine, Mercaptopurine, Thioguanine
Other genes Not actionable	ABCB1, ADRB1, BRCA1, COMT, CYP1A2, CYP2A6, CYP2B6, CYP2C9, CYP3A4, CYP3A5, DPYD, G6PD, HMGCR, P2RY12, SULT1A1, UGT1A1, VKORC1

Date printed: 15.03.2016      Card number: 0000001

Higher dose needed for these drugs

Risk of overdosing and harm to patient if prescribed as usual

**safety-code**  
The Medication Safety Code initiative

What is it?  
The Medication Safety Code on the left represents a patient-specific genetic profile regarding important pharmacogenes.

How does it work?  
After scanning the QR code (e.g. with a smartphone), you are led to a website that displays patient-specific drug dosing recommendations.

www.safety-code.org

U-PGx | Ubiquitous Pharmacogenomics

## Priority 2 – Innovative health and care industry

**AIM:** Turn innovative knowledge and technologies into practical applications benefiting citizens, healthcare systems and businesses

**FOCUS:** Regenerative medicine, advanced therapeutics and regulatory science

### **POLICY DRIVERS:**

[Upgrading the single market](#)

## Innovative health and care industry in Work Programme 2018–2019

- BHC-09-2018: Innovation platforms for advanced therapies of the future
- BHC-07-2019: Regenerative medicine: from new insights to new applications
- BHC-10-2019: Innovation Procurement: Next generation sequencing (NGS) for routine diagnosis

### Coordination and support actions

- HCO-05-2018: Strengthening regulatory sciences and supporting regulatory scientific advice

## Priority 3 – Infectious diseases and improving global health

**AIM:** Fighting infectious diseases and the growing threat of antimicrobial resistance. Addressing the needs of the most vulnerable and the global increase in chronic diseases

**FOCUS:** Emerging infectious diseases, poverty and neglected diseases, stratified host-directed approaches to communicable diseases, maternal and child health, global collaboration on non-communicable diseases (cohorts, brain research, hypertension, diabetes, cancer)

### POLICY DRIVERS:

[European One Health  
Action Plan against  
Antimicrobial Resistance](#)

[Global Action Plan  
on antimicrobial  
resistance](#)

## **Infectious diseases and improving global health in Work Programme 2018–2019 (I)**

- BHC-15-2018: New anti-infective agents for prevention and/or treatment of neglected infectious diseases (NID)
- BHC-16-2018: Global Alliance for Chronic Diseases (GACD) - Scaling-up of evidence-based health interventions at population level for the prevention and management of hypertension and/or diabetes
- BHC-18-2018: Translational collaborative cancer research between Europe and the Community of Latin American and Caribbean States (CELAC)
- BHC-21-2018: Research on HIV, tuberculosis (TB) and/or hepatitis C (HCV) in patients with mono-, co-infections and/or comorbidities in the context of fostering collaboration with the Russian Federation

## **Infectious diseases and improving global health in Work Programme 2018–2019 (II)**

- BHC-13-2019: Mining big data for early detection of infectious disease threats driven by climate change and other factors
- BHC-14-2019: Stratified host-directed approaches to improve prevention, treatment and/or cure of infectious diseases
- BHC-19-2019: Implementation research for maternal and child health

# Infectious diseases and improving global health in Work Programme 2018–2019 (III)

## Coordination and support actions

- HCO-06-2018: Establishment of an International Network of Social Sciences Research Centres to help address governance and other challenges in the preparedness for and the response to infectious threats
- HCO-08-2018: Creation of a European wide sustainable clinical research network for infectious diseases
- HCO-09-2018: Building international efforts on population and patient cohorts
- HCO-10-2018: Coordinating European brain research and developing global initiatives
- HCO-11-2018: Strategic collaboration in health research and innovation between EU and China

## Priority 4 – Innovative health and care systems – Integration of care

**AIM:** Develop effective, accessible and sustainable health interventions and integrated care systems

**FOCUS:** Mental health in the workplace, novel approaches for palliative care, implementation of personalised medicine, HTA, innovation in health care

### **POLICY DRIVERS:**

[Upgrading the single market](#)

[Cross-border healthcare Directive](#)

## Innovative health and care systems – Integration of care in Work Programme 2018–2020

- BHC-23-2018: Novel patient-centred approaches for survivorship, palliation and/or end-of-life care
- BHC-26-2018: HTA research to support evidence-based healthcare
- BHC-22-2019: Mental health in the workplace
- BHC-25-2019: Demonstration pilots for implementation of personalised medicine in healthcare

### Coordination and support actions

- HCO-12-2018: Innovation in healthcare – a CSA towards using pre-commercial procurement and public procurement of innovative solutions in healthcare systems

## Priority 5 – Decoding the role of the environment, including climate change, for health and well-being

**AIM:** Improving the risk assessment of environment on health and well-being, and the related socio-economic impact and developing mitigation measures

**FOCUS:** New testing/screening methods to identify endocrine disrupting chemicals, the development of the 'human exposome' (to allow the assessment of lifelong environmental influences on individuals) and to set the priorities for a new research agenda

### POLICY DRIVERS:

[The 7th Environment Action Programme \(EAP\)](#)

**World Health Organization**  
REGIONAL OFFICE FOR **Europe**

[The UNFCCC Paris Agreement](#)

[REACH and EU related policies](#)

[WHO Environment and Health Process \(since 1989\)](#)

**European Commission**

# Decoding the role of the environment, including climate change, for health and well-being in Work Programme 2018–2019

- BHC-27-2018: New testing and screening methods to identify endocrine disrupting chemicals
- BHC-28-2019: The Human Exposome Project: a toolbox for assessing and addressing the impact of environment on health

## Coordination and support actions

- HCO-13-2018: Setting the priorities for a European environment, climate and health research agenda

## Other actions for 2018–2019

- Subscription fee: Human Frontier Science Programme Organisation
- Studies, activities of the Scientific Panel for Health, conferences, events and outreach activities
- External expertise
- Grant to the Global Alliance for Chronic Diseases
- Expert group for the impact assessment of the planned Commission communication on infectious diseases
- Subscription fee: World RePORT international health research database
- Mobilisation of research funds in case of Public Health Emergencies

## Call deadlines

Better Health and care, economic growth and sustainable health systems

BHC + HCO call topics  
Calls open: 7 November 2017  
Calls close: 18 April 2018

Digital transformation in Health and Care  
Trusted digital solutions and Cybersecurity in Health and Care

DTH, HCC, and SU-TDS call topics  
Calls open: 7 November 2017  
Calls close: 24 April 2018

Exception  
BHC-15-2018  
**Lump Sum Funding: a pilot topic**  
Calls open: 7 November 2017  
First stage: 6 February 2018  
Second stage: 4 September 2018

# International cooperation

# Why International Collaboration?

Success rates of proposals with different numbers of applicants from non-associated countries

Note: Data for collaborative projects of Horizon 2020. Success rate is the ratio of mainlisted over eligible proposals.  
Source: DG RTD - International Cooperation  
Data: CORDA (JRC, EIT & art.185 not included), extraction date: 17/10/2017

## International Cooperation: main features of WP 2018-2020

**General opening:** all topics open to international cooperation

- All SC1 topics are open to international cooperation
- EC contribution: 28 MS, 16 AC and 124 Third countries (General Annexes A.) + USA
- For some other TC: co-funding mechanism (CFM) => Australia, Brazil, Canada, China, Hong Kong & Macau, India, Japan, Republic of Korea, Mexico, Russia, Taiwan

**Topics targeting specific countries /regions** (e.g. CELAC, Russian Federation, Canada, etc.)

- Lower overall participation of TC in WPs 2014-2016 if compared to FP7
- Need to get higher and more visible participation of TC in the last WP
- Stimulate cooperation on targeted areas that represent a burden for EU and TC (e.g. cancer for CELAC)
- Give a politically visible 'sign' of cooperation (science diplomacy)

# International Rare Diseases Research Consortium (IRDiRC)

## ALPHA MAN: Building on successes from FP5 and FP6 to FP7 and beyond

**FP6 HUE-MAN**  
Pre-clinical and clinical therapy protocols;  
Conditions for large-scale enzyme production

**FP7 ALPHA-MAN**  
First in man clinical trials for the therapy;  
Demonstration of safety and efficacy

Marketing authorisation has been applied for

**FP5 EURAMAN**  
Enzyme replacement therapy in a mouse model for alpha-mannosidosis

**IRDiRC initiative**  
*Headline goal:*  
**1000 new therapies and means to diagnose most rare diseases by 2020**

# International Human Epigenome Consortium (IHEC)

Leading Edge  
Essay

Cell

## The International Human Epigenome Consortium: A Blueprint for Scientific Collaboration and Discovery

Hendrik G. Stunnenberg,<sup>1,\*</sup> The International Human Epigenome Consortium,<sup>4</sup> and Martin Hirst<sup>2,3,\*</sup>

<sup>1</sup>Department of Molecular Biology, Faculties of Science and Medicine, Radboud University, Nijmegen, 6525AG, the Netherlands

<sup>2</sup>Department of Microbiology and Immunology, Michael Smith Laboratories, University of British Columbia, Vancouver, BC V6T 1Z4, Canada

<sup>3</sup>Canada's Michael Smith Genome Sciences Centre, BC Cancer Agency, Vancouver, BC V5Z 4S6, Canada

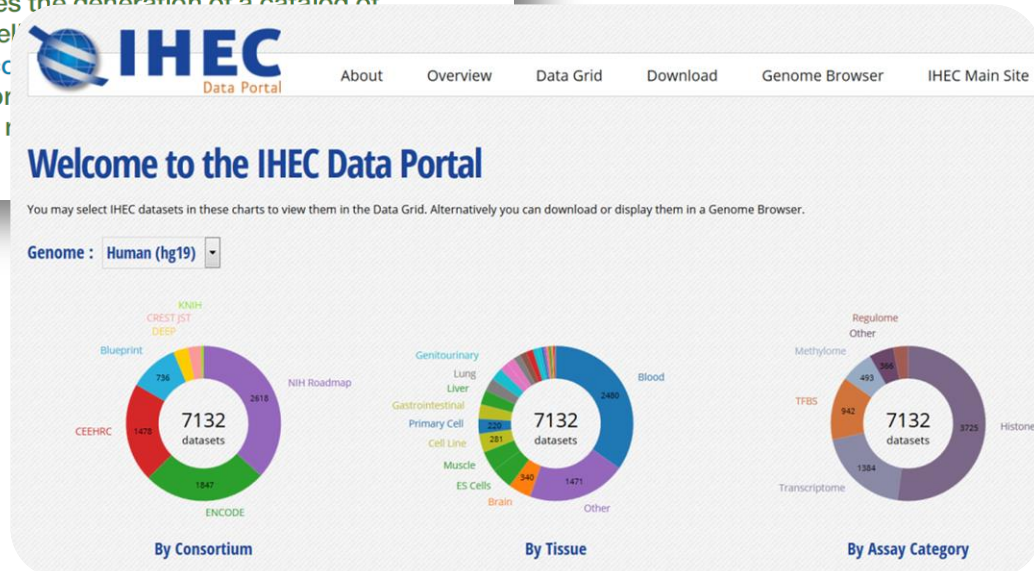

<sup>4</sup><http://ihec-epigenomes.org/>

\*Correspondence: [h.stunnenberg@ncmls.ru.nl](mailto:h.stunnenberg@ncmls.ru.nl) (H.G.S.), [mhirst@bcgsc.ca](mailto:mhirst@bcgsc.ca) (M.H.)

<http://dx.doi.org/10.1016/j.cell.2016.11.007>

The International Human Epigenome Consortium (IHEC) coordinates the generation of a catalog of high-resolution reference epigenomes of major primary human cells presented (see the Cell Press IHEC web portal at <http://www.cell.com>) the coordinated achievements of IHEC teams to gather and interpret datasets to gain insights in the epigenetic control of cell states and disease.

More than 1,000 epigenomes mapped through IHEC initiative, special issue in Cell, success of 'BluePrint' EU project

# Clinical studies

# Template

## Essential information about clinical studies |

### PURPOSE

- Providing structured information to experts for evaluation
- Giving applicants the chance to provide detailed information about clinical studies without page limitations  
Reasons:
  - detailed but important information, e.g. about Scientific Advice Meetings, relevant (regulatory) guidelines, in- / exclusion- criteria, etc.
  - potentially high number of studies
- Providing necessary information to request 'unit costs'

Available under 'call documents'<sup>1</sup> and in submission system

<sup>1</sup>[http://ec.europa.eu/research/participants/data/ref/h2020/other/legal/templ/h2020\\_tmpl-clinical-studies\\_2018-2020\\_en.pdf](http://ec.europa.eu/research/participants/data/ref/h2020/other/legal/templ/h2020_tmpl-clinical-studies_2018-2020_en.pdf)

## Template

## Essential information about clinical studies |

## APPLICABILITY

- Use of template mandatory for certain single-stage and second-stage topics, **if** a clinical study is included
- But: no eligibility criterion, no disadvantage when information provided in other part of proposal
- Rather: more and more appreciated (applicants, evaluators) as an opportunity for structured information
- These topics are listed in the template itself

## Template

### Essential information about clinical studies |

### SCOPE

- Ethical considerations have to be addressed in the respective separate section
- Risks and contingency plans have to be addressed in the respective section of the proposal (part B.3.2 and table 3.2.a) ... If contingency plans are not outlined in the proposal (and the grant agreement), **your grant agreement might be terminated and/or the EU contribution significantly reduced if a study cannot proceed as planned**

"Extensions of project duration can generally not be granted in H2020. Significantly delayed key study milestones (e.g. 'first patient/first visit') might lead to the termination of the grant agreement"

# Open research data pilot

## Open Research Data Pilot

- **Introduced** with H2020 as part of Open Science and Open Access policies of DG RTD.
- **Legal basis:** Art. 29.3 of the H2020 MGA
- A **default** as of 01 January 2017 for SC1 projects
- **'Opt-out' option** only for specific and well justified reasons
- **Principle:** 'As open as possible, as closed as necessary'
- **Type of Data concerned**
  - Data underlying scientific publications (raw/individual patient data (IPD) not concerned)
  - Additional data defined and agreed by the consortium in the data management plan (DMP) (avoiding potential IP and confidentiality infringements)

# Open Research Data Pilot

- 'Opt-out' possible at any stage (but rarely justified):
  - during the application phase
  - during the grant agreement preparation (GAP) phase and
  - after the signature of the grant agreement
- **Costs** associated with open access to research data, can be claimed as eligible costs of any Horizon 2020 grant
- Participation in the ORD pilot is **not part of the evaluation of proposals**
- **First version of the DMP** (as a deliverable) must be submitted within the first 6 months of the project
- General [DMP template](#)\* is available online, draft annotations specific for health research will be available in the near future
- The DMP needs to be updated over the course of the project whenever significant changes arise

\*[http://ec.europa.eu/research/participants/data/ref/h2020/grants\\_manual/hi/oa\\_pilot/h2020-hi-oa-data-mgt\\_en.pdf](http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/hi/oa_pilot/h2020-hi-oa-data-mgt_en.pdf)

# Public-Private Partnership

innovative  
medicines  
initiative

European  
Commission

## BUDGET: € 3.276 billion

2013-2020: EC: €1.638 bn + EFPIA: €1.425 bn  
+ Associated Partners: €0.213 bn

Partnership  
2008 - 2024

€2.5 bn

efpia

€2.5 bn

The right prevention and treatment  
for the right patient at the right time  
Strategic Research Agenda for  
Innovative Medicines Initiative 2

- **30 November: Launch of Call 13** (16 topics) – EU contribution: € 124.5m + In-kind contribution from EFPIA & Associated Partners: € 113.5m

- supports health research and innovation, speeding up the development of innovative medicines, particularly in areas of unmet medical need

- covers the full spectrum of drug discovery and development

- facilitates collaboration between universities, research centres, the pharmaceutical and other industries; SMEs, patient organisations, and medicines regulators

- Strategic Research Agenda based on the WHO Priority Medicine Report renewed in July 2013

<http://www.imi.europa.eu/apply-funding/general-overview/tips-applicants>

# IMI – Lead factory

EUROPEAN  
LEAD FACTORY

## Joint European Compound Collection

**320 000 cpds**  
from **7 pharma**  
**companies**

**200 000 cpds**  
from public  
partners

## European Screening Centre

Advanced, ultra  
high throughput  
**screening**  
**facilities** &  
**expertise** on  
logistics,  
medicinal  
chemistry, etc.

'Access to the European Lead Factory has fast-forwarded our drug discovery programme in the field of oncology by several years.' – Huib Ovaa, Netherlands Cancer Institute

'ELF support & its high quality compound library ... will allow Effecta Pharma to expand its drug discovery efforts for dengue and gives an important boost to tackling this viral disease.' – Effecta Pharma, UK biotech company

- ✓ Leading role for SMEs
- ✓ Quality & diversity of compounds recognised
- ✓ Award-winning IP solution
- ✓ Happy users!

# Public-Public Partnership

# Coordinating national research

## *Joint Programming initiative on Neurodegenerative Disease Research (JPND)*

- 30 countries; EU Member States-led initiative **to increase coordinated investment among participating countries**
- Strategic Research Agenda spanning biomedical, healthcare and social science research
- **Public database mapping** relevant national and European research and infrastructures
- Informing **national research agendas/plans**
- Currently some **EUR 123 million invested in 9 transnational calls (incl. co-fund of 10 million from EC)**

**BUDGET: ~ € 1.37 billion**  
EC: € 683 m + MS: € 683 m

- EDCTP2 Annual Work Plan 2018 to be adopted mid-2018:  
**EU-funded activities: € 115m + new Participating States: € 115m**

- covers research accelerating clinical development of medical interventions to prevent or treat HIV/AIDS, tuberculosis, malaria and other infectious diseases

- includes the development of drugs, microbicides, vaccines, diagnostics and their delivery

- supports coordination of European national research programmes

- funds collaboration between EU, European countries and sub-Saharan African countries

[www.edctp.org/see-work/strategy](http://www.edctp.org/see-work/strategy)  
[www.edctp.org/funding-opportunities/calls](http://www.edctp.org/funding-opportunities/calls)

# EDCTP: Recent highlights

**Two HIV paediatric formulas – safe and highly effective at protecting infants during breastfeeding up to 12 months after birth**

*The Lancet, 18 November 2015*

**Pyramax® approved as antimalarial for treatment of multiple episodes of malaria**

*EMA news: Meeting highlights from the Committee for Medicinal Products for Human Use (CHMP) 16-19 November 2015*

**9 December 2015 – EDCTP receives Science Diplomacy Award at South African Science Forum**

## European Innovation Council (EIC) pilot

The EIC pilot supports top-class innovators, entrepreneurs, small companies and scientists with bright ideas and the ambition to scale up internationally. It brings together the parts of Horizon 2020 that provide funding, advice and networking opportunities for those at cutting edge of innovation.

Commission

# European Innovation Council: pilot 2018-2020

## € 2.7 billion to support +5.000 SMEs and innovators

**ECOSYSTEM SUPPORT: COACHING, MENTORING** for all beneficiaries

**Early stage science & tech**  
*Emerging tech, Visionary ideas*

**FET-OPEN**  
Future Emerging Technologies

**Test and co-create**  
*Demonstrate, validate*

**FTI**  
Fast Track to Innovation

**Feasibility / Startup**

**SME Instrument**  
Phase 1

**Development**

**SME Instrument**  
Phase 2

**Scale up Investment**

**Soft blending**

**MARKET CREATING**

**6 EIC HORIZON PRIZES:**

1. Innovative Batteries for eVehicles
2. Fuel from the Sun: Artificial Photosynthesis
- 3. Early Warning for Epidemics**
4. Blockchains for Social Good
5. Low-Cost Space Launch
6. Affordable High-Tech for Humanitarian Aid

# Full bottom-up and introduction of interviews are the main new features of the evaluation under EIC Pilot

Instrument →	SME-Instrument		FTI	FET-Open	EIC Horizon prizes
	Phase 1	Phase 2			
<b>For whom</b>	One or more eligible <sup>1</sup> SMEs		From 3 to 5 eligible <sup>1</sup> entities (mostly industrial <sup>2</sup> )	At least 3 entities <sup>3</sup>	One or more entities (with restrictions <sup>1</sup> for some of the prizes)
<b>Maximum funding<sup>4</sup></b>	50,000 €	2.5 M€	3 M€	3 M€ (RIAs) 0.5 M€ (CSAs)	Varies for each prize
<b>Total budget 2018-20</b>	164 M€	1425 M€	300 M€	647 M€ (RIAs) 10 M€ (CSAs)	40 M€
<b>Focus</b>	Exploring the feasibility of a business idea (~ 6 months)	Breakthrough innovation & international growth (12-24 months)	Close-to-market innovation	Radically new technologies	6 different topics (major societal issues)

(1) Applicants must be established in an EU Member State or in a country associated to Horizon 2020

(2) This industry involvement implies: (a) either the allocation of at least 60% of the budget to industry participants in the consortium, or (b) the presence of a minimum number of two industry participants in a consortium of three or four partners, or of three industry participants in a consortium of five partners

(3) A FET-Open consortium must always include at least 3 participants from 3 different EU Member States or Associated Countries. In addition to these three partners, any legal entity from anywhere in the world can also be included in the consortium.

(4) Per project – with possible exceptions

# Is EU funding worth for SMEs ?

## EU-funding boosts SMEs deal activity

2010-2015: **4,6 deals per SME**  
(twice more than for non-EU funded SMEs)

### Example: **NABATIVI** project

Fig. 2: Deal types of EU-funded healthcare SMEs (2010-2015)

Source: CORDA/ MedTrack

## EU-funding boosts SME's Initial Public Offering

- Example: **Immunovia**
- Listed at Nasdaq North, market value tripled in 18 months to €300m
