

# eatris

European infrastructure  
for translational medicine

# WHY EATRIS?

## VISION

Accelerate translation of science into medical products that benefit patients and improve human health.

## MISSION

Support researchers in developing their biomedical discoveries for novel preventive, diagnostic or therapeutic products

## SCOPE

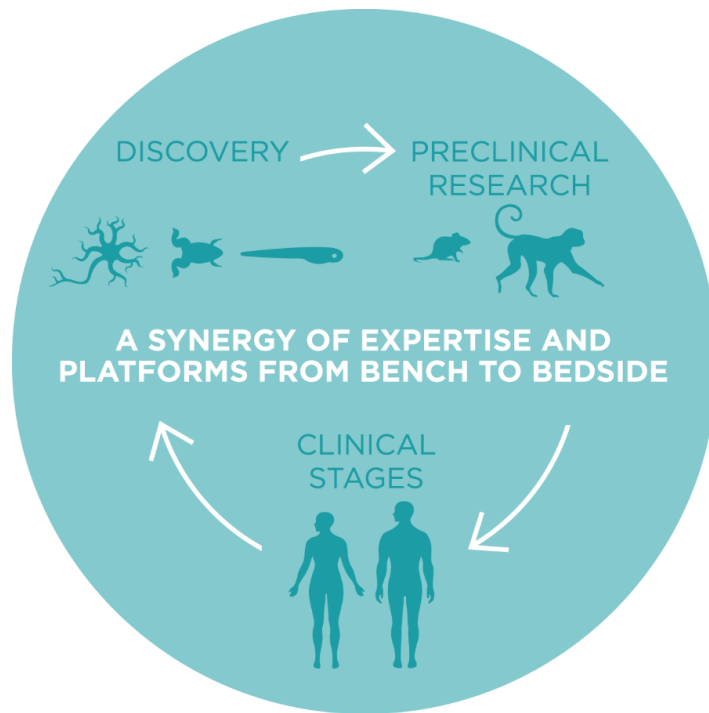

From preclinical discovery to clinical proof of concept (Advanced Therapy Medicinal Products (ATMP), Small Molecules, Vaccines, Imaging and Tracing, Biomarkers)

## How?

- By improving access to academic expertise
- By increasing utilisation of academic infrastructure (80 high end facilities across 12 EU member countries)
- By developing and validating tools that improve pipeline output
- By facilitating public-private collaboration

# WHY NEURATRIS?

... to validate new treatments & biomarkers...

A complementary expertise of 5 renowned French hospitals and research centers...

... for Parkinson, Huntington, Alzheimer and multiple sclerosis

- **ONE DEDICATED COORDINATION OFFICE**

**Anne-Charlotte Fauvel:** EU funding Manager (based in Amsterdam)

EATRIS involved in European calls since its inception in 2013 (2 projects FP7, 4 projects H2020, 1 project Erasmus +)

- **FAST MATCHMAKING**

Thanks to a comprehensive inventory of the capabilities of 80 member institutions, EATRIS can help you identify the right consortium partners to strengthen your proposal.

Free of charge service performed by the coordination office.

List of matches available within a few business days.

**COUNTRIES PART OF EATRIS**

Czech Republic

Finland

Italy

Luxembourg

Slovenia

Sweden

Estonia

France

Latvia

Norway

Spain

The Netherlands (host of the infrastructure)

- **REGULATORY SUPPORT**

Service provided by experts from the Coordination office or affiliated institution with strong expertise in the field.  
Joining your proposal as partner.

Activities include:

- Assessing the project's regulatory strategy and feasibility;
- Interacting with the relevant regulatory authorities;
- Answering any regulatory question arising during the project's lifetime;
- Ensuring the project fulfils all regulatory requirements.

- **IMPACT AND EXPLOITATION**

Range of translational services performed by EATRIS Coordination office.  
Joining your proposal as partner.

Activities include:

- Exploitation management & industry partnering strategy;
- Evaluation of the translational potential of the results generated during the project;
- Full translational assessment for applied research projects to define follow-up validation route;
- Early Health Technology Assessment (HTA) support;
- Tailor-made training workshops (expert identification, design, supervision).
