Competencies

- *Organisation competencies*

- *Organisation experience in the European project*

- *The skills you can bring*

  Since its creation in 1987, ARCLAN designs resilient and efficient solutions to protect our customer assets and especially people.

  ARCLAN main solutions are Intelligent Video protection and Alert & Alarm Management systems to secure critical industrial sites (energy, chemicals,...) as well as public infrastructures such as Telecom, water/electricity distribution, transportation…
  We design embeded software in electronics, cameras…

  We specialise in mobility awareness through mobile solutions and mobile networks (LTE private network to foster Seurity & Industry 4.0 expectations).

Video analytics & Alert management

Embedded solution with event détection (périmétrique, surface, sonore,…)

- **Expo-Protection, Security Essen , Hannover Messe**

- IPRecord-MX4 analytics
    - Analyses existing video cameras stream,
    - Linked to external solution (Access control,…),
    - vehicles tracking, wrong/forbidden direction detection
