# STREET

## SMART GREEN SHARED TRANSPORTATION

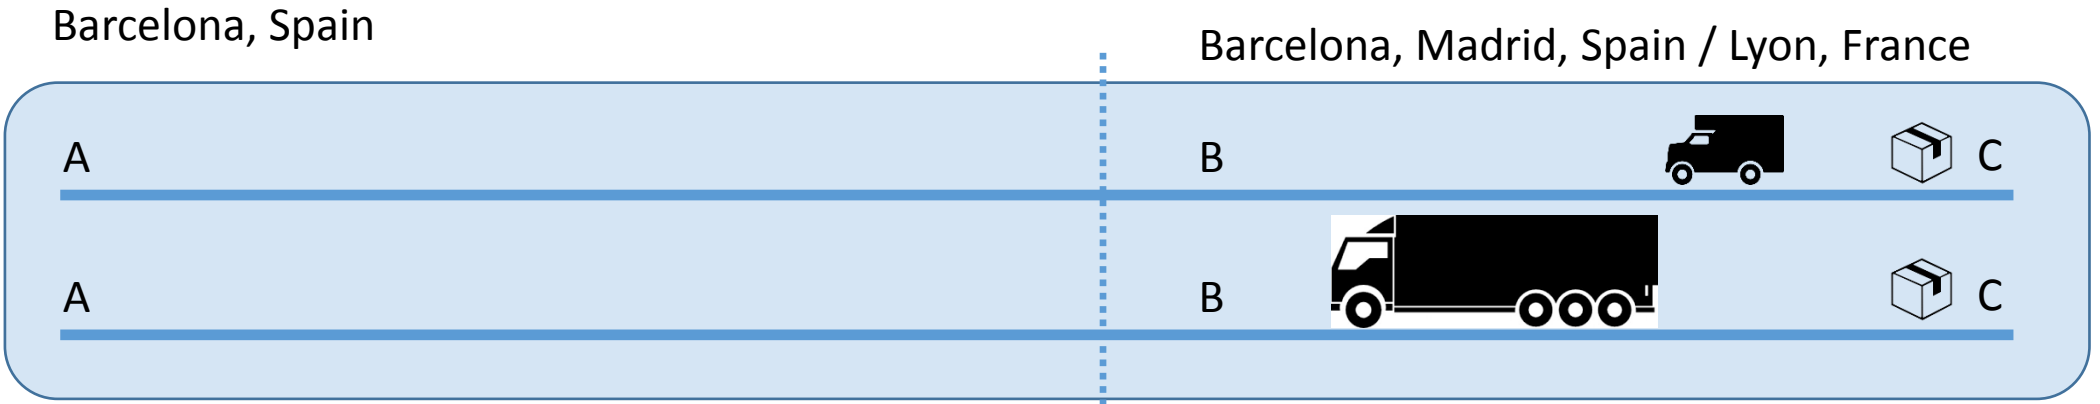

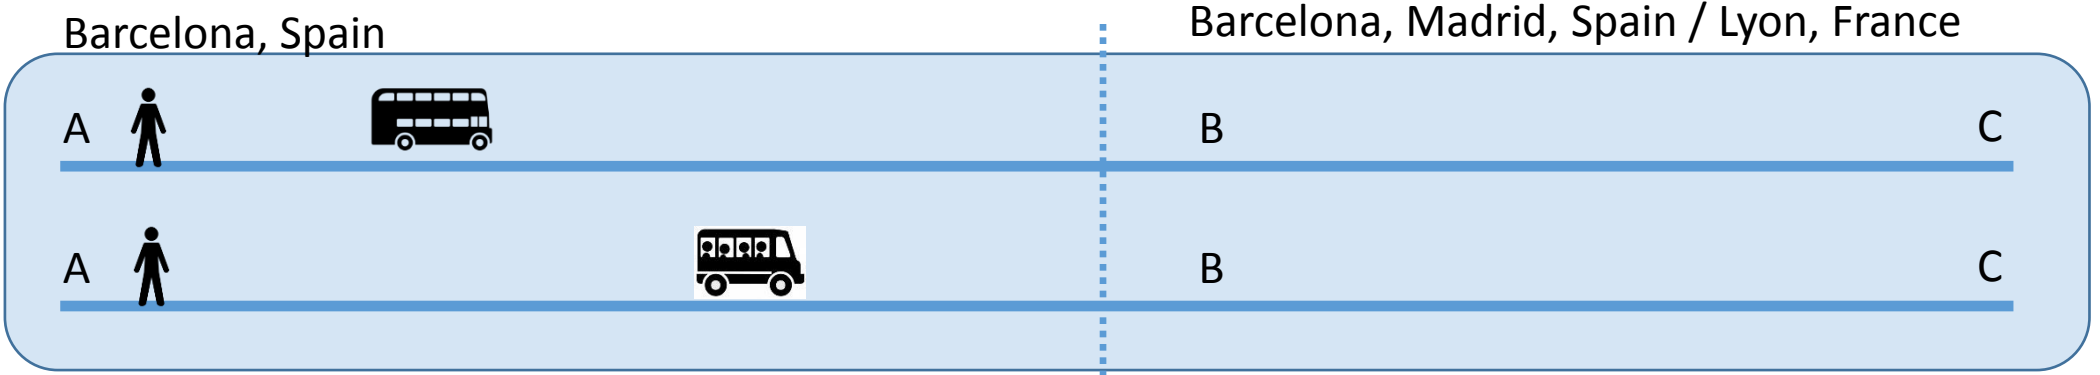

STREET project aims to establish a transportation platform for almost all transportation mediums to let them being used a more smart and efficient way. It can be applicable to public transportation in large cities, public transportation between the cities with in a country, inter/intra city logistics and inter/intra country logistics with all transportation mediums (Cars, Buses, Shuttles, Lorries, TIRs and even freight planes and freight ships)

- Adhering to the legal frameworks (not like car-sharing)
- Reduce energy consumption by encouraging mass transport
- Withdrawing surplus vehicles from roads

IDEA & EXAMPLES

## TARGET CALL: MOBILITY FOR GROWTH:

1. Safe, integrated and resilient transport systems

### Partners from ...

- Logistics
- Public transportation
- Local authorities, policy makers
- Universities, research institutes
- Law companies

**...are most welcomed**
