

# FORREST

- Ulrich Seldeslachts / Richard Chisnall
- [ulrich@leadersinsecurity.org](mailto:ulrich@leadersinsecurity.org) / [richard.chisnall@leadersinsecurity.org](mailto:richard.chisnall@leadersinsecurity.org)
- LSEC - Leaders In Security : a non-profit European (vzw) industry association (300+), cluster and user community (3500+ end users) supporting innovation & development of cyber security. ECSO Member and Global EPIC partner.
- Partner – WP Leader
  - Requirement gathering and validation
  - Maximising impact through:  
market analysis; outreach to industry and wider dissemination.
- Proposal activity:  
**SU-DRS02-2018-2019-2020: Technologies for first responders  
(Open call)**

# Proposal idea/content

- **Cyber Security Tools for First Responders**

- **Idea**

- Use System Engineering approach with strong links to practitioners to support formal User Requirements Definition through to Verification to maximise impact.
- Using requirements from first responders to guide Cyber Security Solution providers to enhance technologies for first responders.
- Providing First Responders tools.
- Enhancing user needs and capability gap analysis from earlier projects. Support to the verification and demonstration phases.
- Validate Cyber Security tools with First Responders by training and educational materials.

# Project participants

- Seeking Coordinator and Consortium that desires to augment its impact by confirming market requirements and exploiting market-pull in an objective and scientific way.
- ...and wishes to interact with an established body of industry participants and practitioners.
- Seeking further links with First Responders
