

# SU-DRS02-2018

- Ulrich Seldeslachts / Richard Chisnall
- [ulrich@leadersinsecurity.org](mailto:ulrich@leadersinsecurity.org) / [richard.chisnall@leadersinsecurity.org](mailto:richard.chisnall@leadersinsecurity.org)
- LSEC - Leaders In Security : a non-profit European (vzw) industry association, cluster and user community supporting innovation & development of cyber security
- WP leader
  - Requirement gathering or Exploitation
- Proposal activity:  
**SU-DRS02-2018-2019-2020: Technologies for first responders**

# Proposal idea/content

- **Build on links to first responders and H2020 project TAKEDOWN**
- **Idea**
  - Use System Engineering approach with strong links to practitioners to support formal User Requirements Definition through to Verification to maximise impact.

- **Offer**

LSEC itself offers to:

  - Lead on capturing user needs and capability gap analysis. Support to the verification and demonstration phases
  - Links to practitioners in LEA
  - Lead WP on near-term market impact components: market analysis; exploitation; IP; business models; dissemination

# Project participants

- Seeking Coordinator and Consortium that desires to augment its impact by confirming market requirements and exploiting market-pull in an objective and scientific way.
- And wishes to interact with an established body of industry participants and practitioners.
