TARGETED TOPIC

SU-DRS01-2019

Human factors, and social, societal, and organisational aspects for disaster-resilient societies

List your 3 major needs

- **1 Policy formulation tools** that facilitate the analysis and evaluation of the same, in order to align objectives, and facilitate their implementation and integration from an operational point of view with criteria of efficiency and effectiveness.
- **2 Efficient governance:** methods, processes and tools that facilitate command and control structures at a strategic, tactical and operational level in the context of multi-agency intervention.
- **3 Integration** of systems and communications in multiagency command and control platforms.

- **Policies:**

Greater Security & Safety integration

- **Management:**

Integration of systems and communications in multiagency command and control platforms.

- **Ethics and Rights:**

Research and development of solutions that overcome the challenges of protecting citizens and their fundamental rights, especially in social networks and the digital society.

The ERTZAINZA has the following strengths:

- ***Combination of experience and illusion***, being the integral police and a society that has shown to have a high degree of resilience. (Many years of dictatorship and terrorism, some important natural catastrophes, floods, etc.)
- ***Flexibility and high capacity*** to adapt to social and technological changes. (A society of 2.1 M inhabitants, with a police force of 8,000, apart from the local police of the municipalities).
- ***Resources and capabilities*** to provide public safety services, people, facilities and high-level infrastructure, which insure the implementation and development of innovation projects.
- ***Networking***: The ERTZAINZA is one more part of the Public Security System of the Basque Country, and therefore, it is in close contact with the rest of the stakeholders of the System.
