Human factors, and social, societal, and organisational aspects for disaster-resilient societies

*We want to solve the following security and emergency issues to make our society more secure.*

- *Effective information processing and analysis system*
- *A support system for decision and policy making*
- *Cooperation with civil society organisations*

- *We are open to project proposals related to IT and DSS for making society more secure.*
- *GAMER is looking for consortia to join as an enterprise and/or to be a bridge between to the relevant first responders and practitioners from Turkey .*
