TARGETED TOPIC

SU-DRS03-2019	Pre-standardisation in crisis management (including natural hazard and CBRN-E emergencies)
SU-DRS04-2019	Chemical, biological, radiological and nuclear (CBRN) cluster

List your 3 major needs

- **1 Policies:** *The most pressing problem in the RBQ units is to convert them into a multi-agency reality by implementing the multidisciplinary nature that is always used when participating in any training or scientific forum.*
- **2 Governance:** *methods, processes and tools that facilitate command and control structures at a strategic, tactical and operational level in the context of multi-agency intervention.*
- **3 Integration** *"technological advances*

- **Policies:**

Develop innovative processes that help manage the complexity of this type of emergencies, through an inter and intradisciplinary approach, integrating teams of health services, civil protection, police, fire, logistics, etc.

- **Management:**

Decontamination: Work to incorporate other agencies and first responders in emergencies (firefighters ...) to this specific task that requires an important training work.

- **Training:**

Keep us informed and attentive to the development of the industry in this aspect is a must

The ERTZAINZA has the following strengths:

- ***Combination of experience and illusion***, being the integral police and a society that has shown to have a high degree of resilience. (Many years of dictatorship and terrorism, some important natural catastrophes, floods, etc.)
- ***Flexibility and high capacity*** to adapt to social and technological changes. (A society of 2.1 M inhabitants, with a police force of 8,000, apart from the local police of the municipalities).
- ***Resources and capabilities*** to provide public safety services, people, facilities and high-level infrastructure, which insure the implementation and development of innovation projects.
- ***Networking***: The ERTZAINZA is one more part of the Public Security System of the Basque Country, and therefore, it is in close contact with the rest of the stakeholders of the System.
