## Targeted topics

<a href="#">ICT-08-2019</a>	Security and resilience for collaborative manufacturing environments	IA
<a href="#">SU-DS03-2019-2020</a>	Digital Security and privacy for citizens and SMEs and Micro Enterprises	IA
<a href="#">SU-DS05-2018-2019</a>	Digital security, privacy, data protection and accountability in critical sectors	IA & RIA
<a href="#">SU-INFRA01-2018-2019-2020</a>	Prevention, detection, response and mitigation of physical and cyber threats to critical infrastructure	IA
<a href="#">SU-INFRA02-2019</a>	Security for smart and safe cities, including for public spaces	IA
<a href="#">SU-ICT-02-2020</a>	Building blocks for resilience in evolving systems	RIA

# Competencies

- *C and C++ Software Verification with accessible formal methods based tools*
  - *Work package leader in national projects (FUI, IA, ANR)*
  - *Possible contributions in any project with software development:*
    - **Prepare software standard conformance**
    - **Catch software errors as early as possible**
    - **Make software cyber-resistant**
    - **Organize development with safety and cyber-security from the start**
    - **Manage the cost of software verification: adapt the existing practice to match the domain constraints**
    - **Contribute directly to development**
    - **Adapt formal verification tools to existing tool chains**
- **Wherever the software has to be secure and safe**
