

ALGODONE *Christophe Ballan* Christophe@algodone.com **0688514207**

Targeted topics

*Supprimer les lignes qui en moins d'intérêt pour vous.
La presentation sera en Français si possible mais les planches doivent être en Anglais car elles seront publiées.*

ICT-08-2019	Security and resilience for collaborative manufacturing environments	IA
SU-INFRA01-2018-2019-2020	Prevention, detection, response and mitigation of physical and cyber threats to critical infrastructure	IA
SU-ICT-02-2020	Building blocks for resilience in evolving systems	RIA

Competencies

- *Competencies in Hardware security meaning security at Semiconductor level*
- *No experience in H2020 so far*
- *We are a team of highly experienced semiconductor designers; we provide security at the chip level which we believe is more secure than software level*

Project idea: IoT Security

- *IoT has become one of the weakest link in the complete security*
 - **Best would be to design Security at the design level**
 - **Second best is to design a low cost basic security element that would provide minimal security for minimal cost for all IoT related objects**
- *We would be interested to develop a proof of concept with a major OEM player*
