

**TOMARO**

General information

Organisation name: *TOMARO SAS*
Contact name: *Jacques NOEL*
Email: *contact@tomaro.fr*

Targeted topic :

<u>LC-SC3-SCC-1-2018-2019-2020</u>	<i>Smart Cities and Communities</i>	IA
------------------------------------	-------------------------------------	----

Skills

- *Organization skills : software editor with embedded deeptech (AI, Big Data)*
- *Organization experience in the European project : none*
- *The skills we can bring : software tools and associated services*

Project idea

- *Project idea : TOMARO is building NRJnious, a software platform to empower any part of territories fed by new energy sources to automatically activate available levers of flexibility on a defined perimeter in order to keep a permanent synchronization between production and consumption and so, delivering a high level of QoS to users.*
- *We are looking for partnerships with territories in order to realize positive-energy blocks/districts that can be gradually scaled up to city level : European lighthouse cities helping to plan and initiate the replication of the deployed solutions in the Follower cities, adapted to different local conditions.*
