

Partner search

Date (DD-MM-YY)

- (*) Relevant topic in work programme

- Energy efficiency

- Quick description of the project

Homeys is a start-up which uses IoT sensors to gather temperature and humidity data in buildings. The data is then analysed and presented on a web interface to support a better management of energy and deliver savings.

We are looking for partners who have instrumented real estate properties to test and improve our algorithms.

- (*) Description of the expertise requested (up to 1000 characters)

We would be interested in partnering with a company having deep building modelling expertise based on real data

- Keywords describing the expertise requested (up to 10 words)

- Big data / machine learning / connected building
