

5G PPP Phase III

H2020 ICT National Contact Points Training
25 October 2017

Bernard BARANI – deputy Head of Unit
Mario SCILLIA – Programme Officer
Eric GAUDILLAT – Programme Officer

Future Connectivity Systems
European Commission – DG CONNECT

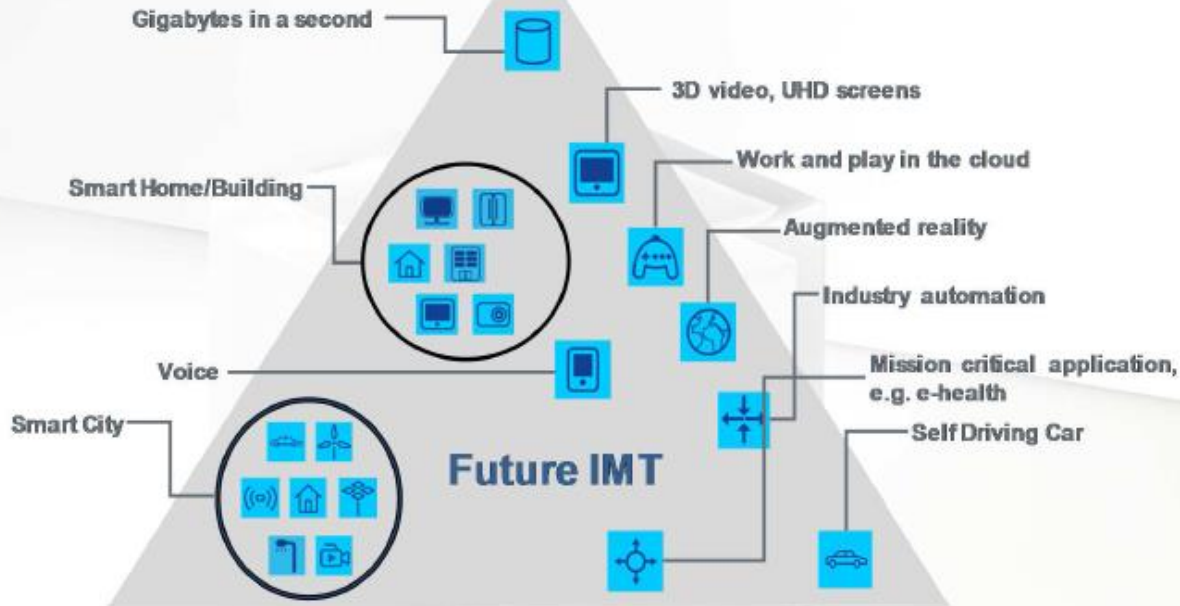

5G Context and European policy

5G PPP - Addressing 5G as a strategic and global issue

- About 10 years to develop a new network generation, R&I started around 2012 in many countries, Europe at the forefront
- Today, **huge efforts world-wide** in the context of Public-Private partnerships
- Critical for Europe to lead in 5G, both as a **supply centre of excellence** and as an **early adopter through lead markets**
- **Europe has developed its 5G path** on which traction is now being created and **needs to reach its objectives**
- **The 5G PPP is a fundamental building block of the EU 5G Policy strategy**

5G Drivers

1. Enhanced Mobile Broadband

2. Massive-Machine Type
Communication

3. Ultra-reliable and Low
Latency Communication

European Vision

FACTORIES OF THE FUTURE

- 1 Time-critical process control
- 2 Non time-critical factory automation
- 3 Remote control
- 4 Intra/Inter-enterprise communication
- 5 Connected goods

ENERGY

- 1 Grid access
- 2 Grid backhaul
- 3 Grid backbone

AUTOMOTIVE

- 1 Automated driving
- 2 Share My View

- 1 Bird's Eye View
- 2 Digitalization of Transport and Logistics
- 3 Information Society on the road

Sponsored by the European Commission

5G empowering vertical industries

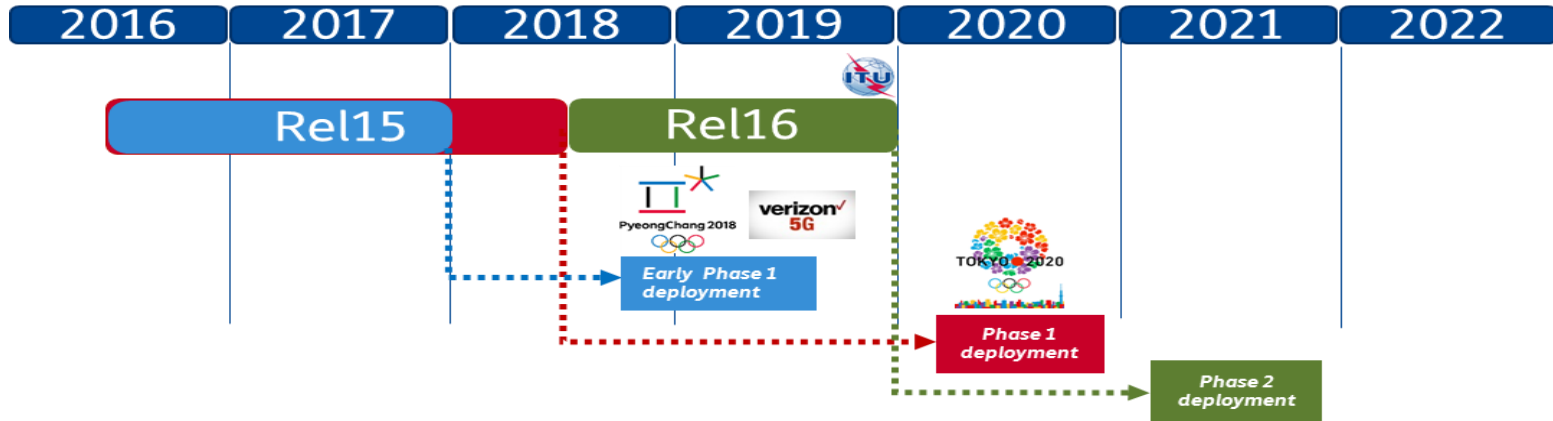

5G VERTICAL SECTORS

With 5G, networks will be transformed into intelligent orchestration platforms.

By cementing strong relationships between vendors, operators and verticals, 5G will open the field to new business value propositions.

Use-cases originating from verticals should be considered as drivers of 5G requirements from the onset with high priority and covered in the early phases of the standardisation process.

3GPP 5G overall Roadmap

- 5G features will be phased as it will be not possible to standardize all in time for Rel-15 completion and early deployments (2018-2020)
- Release 15 (aka phase 1, by June '18) will aim at a first phase of expected deployments in 2020 (Japan Olympic Games) new radio (NR) + new core (NC)
- Release 16 (aka phase 2, by Dec '19) will target the ITU IMT-2020 submission
- Additional “Early drop” milestone (Dec '17) recently added to meet early market needs

Towards Deployment

- **EU** - Private trials, verticals, 2017-18
- Deployment targets, 5G Action Plan
- **US** - Verizon fixed wireless access trials, 2017
- AT&T TV streaming trials, 2017
- **South Korea**, winter Olympic games, 2018
- **Japan**, Olympic games, 2020
- **China**, technology and system trials under National Key Projects

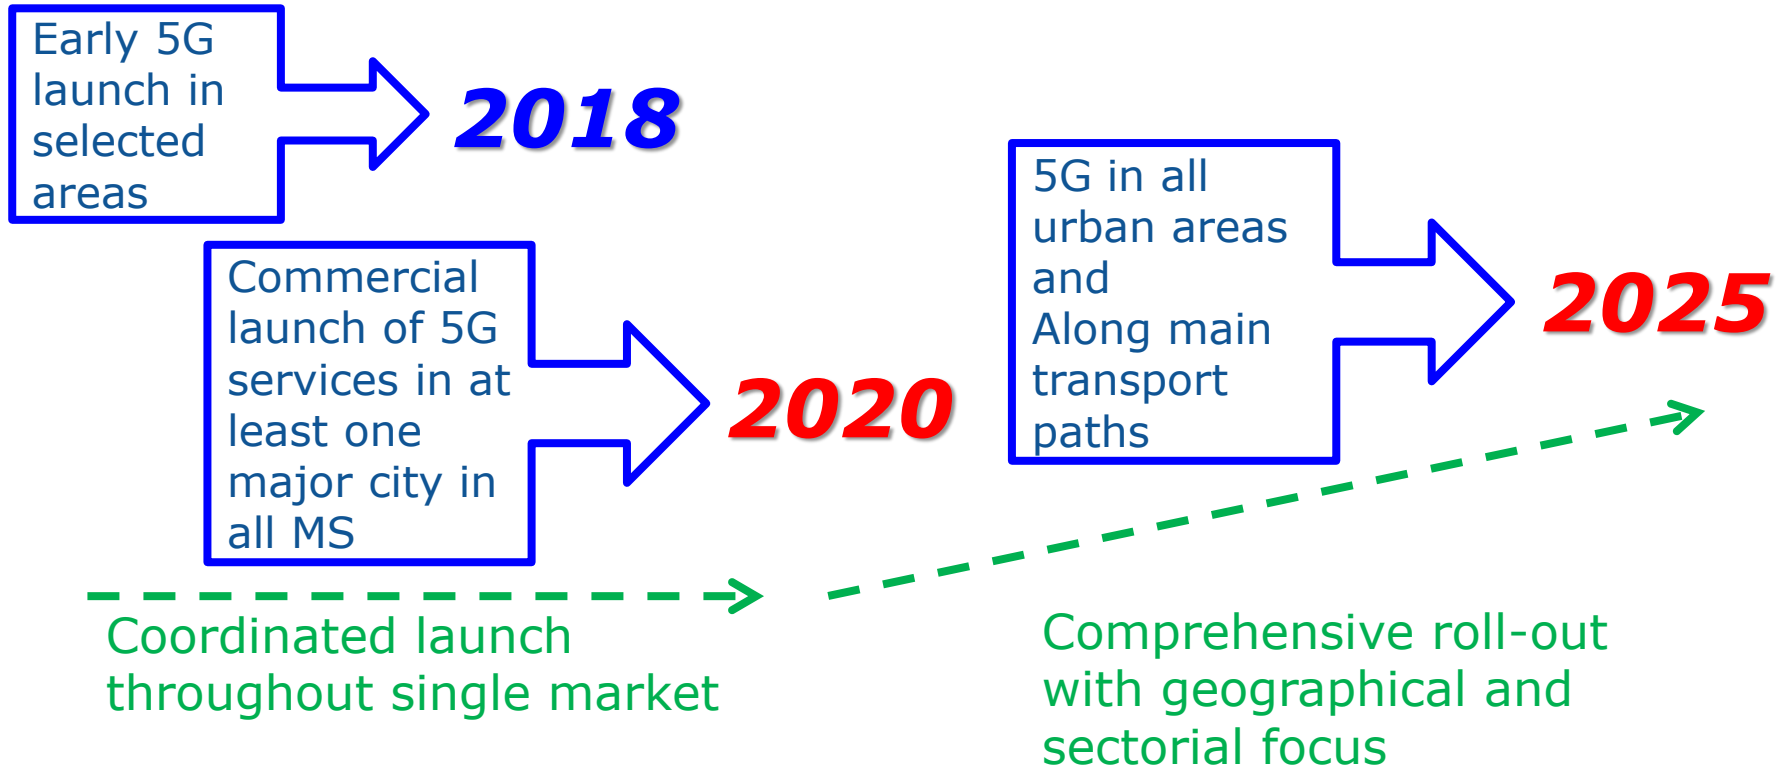

When do you expect your company will deploy?

The European Commission 5G Action Plan

- **EU policy measures for 5G deployment**
- **Part of the September 2016 "Connectivity Package"**
- **2015 – 2025 deployment targets**
- **Pre-commercial trials to start 2018**

5G Action Plan: European approach to 5G introduction

EU 5G "Pioneer Bands"

700 MHz (harmonised, ongoing assignment)

- ✓ European Commission Decision: technical harmonisation (April'16)
- ✓ UHF Decision: assignment deadline 2020 (April'17)

3.6 GHz (harmonised, available, partly used)

- ✓ Review of European Commission Decision by 2019 (ongoing)
- ✓ Re-farming/defragmentation for larger bandwidths (ongoing)

26 GHz (in preparation)

- ✓ Harmonised technical/sharing conditions (ongoing)
- ✓ European Commission Decision before WRC-19
- ✓ Services & authorisation models

European Trials Roadmap

5G Action Plan called for trials roadmap

- ✓ To help technology and business model validation
- ✓ To prepare for early deployments
- ✓ To foster partnership with verticals and creation of ecosystem

Roadmap announced in MWC in Barcelona (February '17)

- ✓ Support by key players of 5G in Europe
- ✓ Focussed on verticals and cities

5G Pan-European Trials Roadmap v1: 3rd 5G Global Event, Tokyo (May '17)

- ✓ Part of this implementation is supported by the 5G PPP
- ✓ Stakeholder commitment is key to implement the roadmap

5G Public Private Partnership (5G PPP)

Public Private Partnership (PPP) R&I Programme

- Industry driven initiative, including vertical industries
- Support EU positioning in global race to 5G
- Up to 700 million € public funding under H2020
 - To be matched by private funding of at least 3.5 billion €
- Support implementation of EU vision and policies (Pre-standardisation, Spectrum, International cooperation, trials and deployment)
- Implementation through 5G Infrastructure Association
- 3 Phases until 2020
- ***BUT NOT BUSINESS AS USUAL!***

Focus on programme results and impact

Collaboration matters!

The projects are the engine of the 5GPPP:

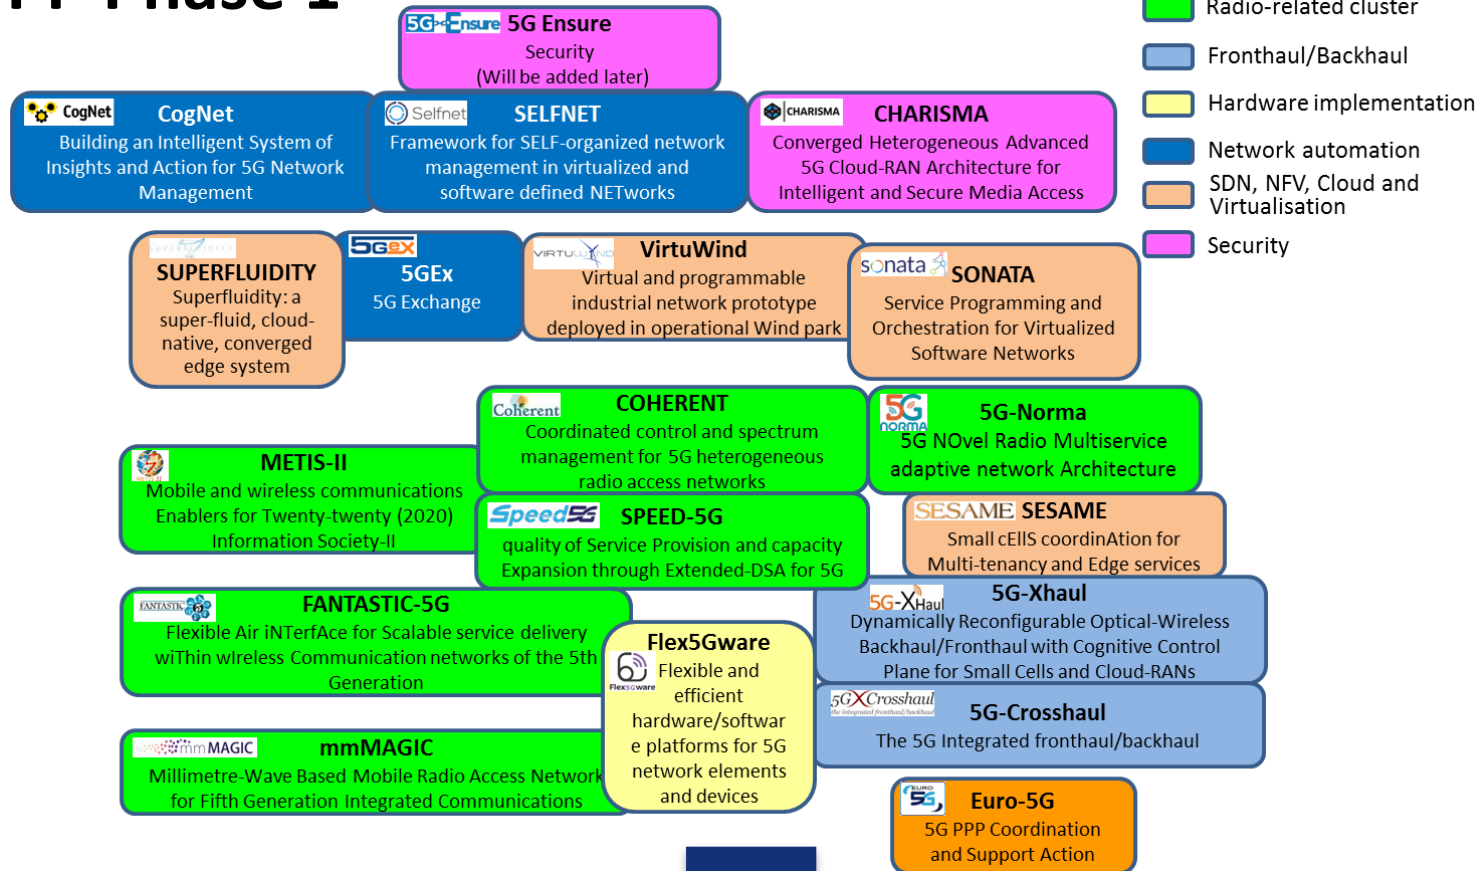

- ✓ Support implementation of EU Vision and policies
- ✓ Populating the 5G association's working groups and collaboration structures
- ✓ Providing substantial inputs (ex: standardization, spectrum, KPIs)
- ✓ Integration to and contribution towards international developments and deployment

Collaboration agreement between projects through Complementary grants, Art 41.4 MGA (in the model of Phases 1 and 2)

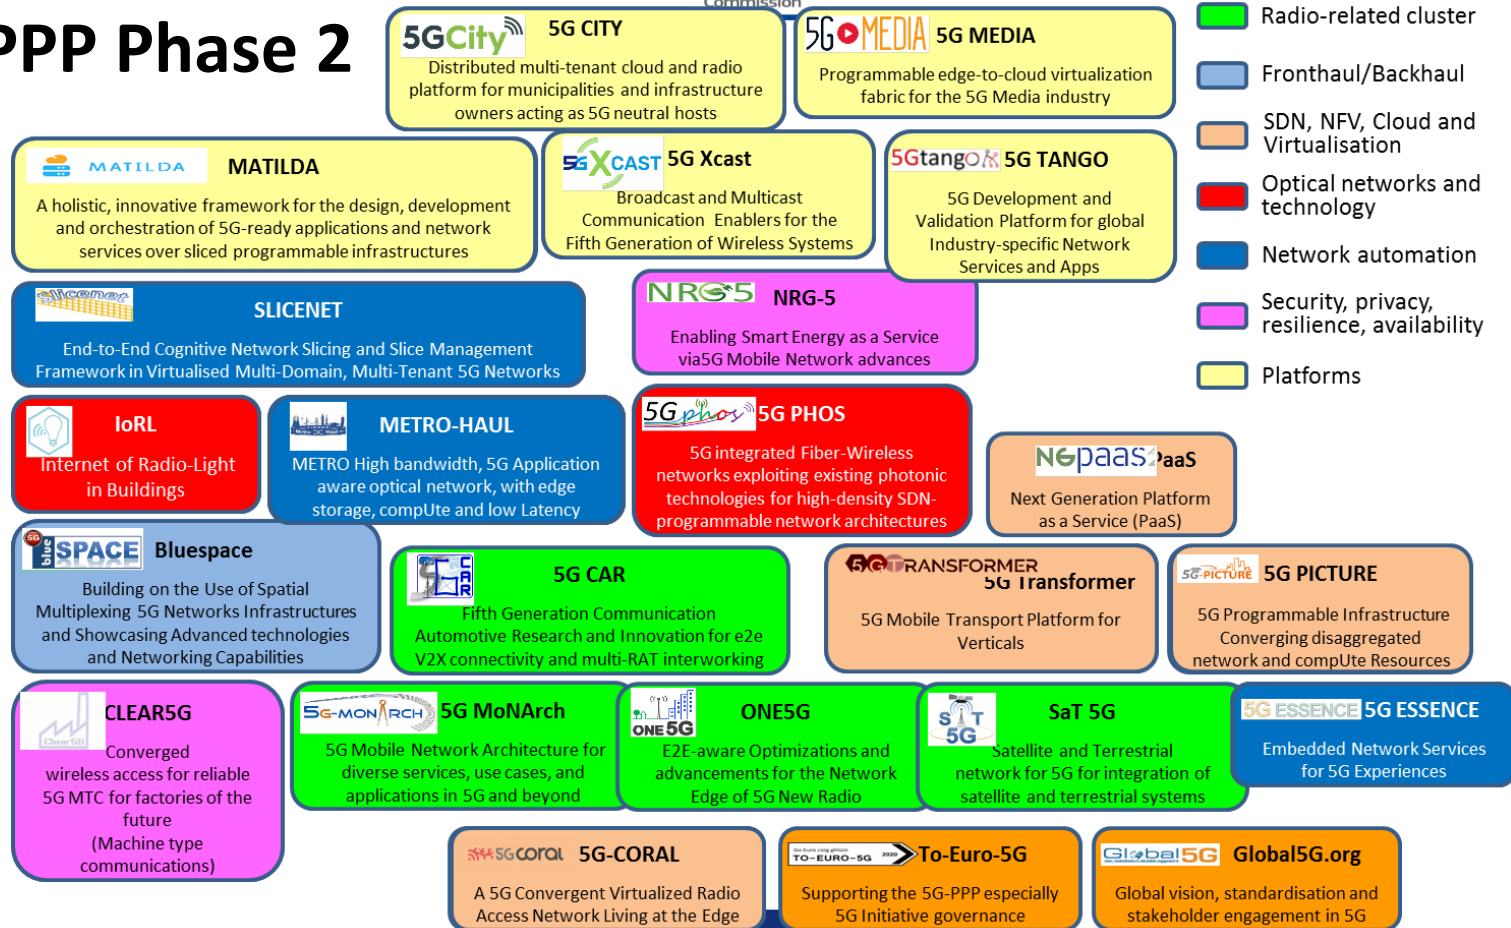

- ✓ Joint definition of issues of common interests
- ✓ Sharing of results
- ✓ common approaches to standardization
- ✓ common dissemination and awareness raising activities

More than just projects – it's a PROGRAMME!

5G PPP Phase 1

5G PPP Phase 2

5G PPP Phase 3

WP18-20, pre-published

User needs, partnerships with vertical industries

5G R&I for "Long Term Evolution"

Early 5G
introduction
Lower frequency
bands

Later 5G
introduction
Higher frequency
bands

Phase 3 b) Integrated Verification Trial
- radio+network+applications -

**Kick off at EUCNC
Conference 12-15 June,
Oulu, Fin**

**5G Connected Cars in EU X
border corridors**

**Phase 3 a) Verification
Demo/Trial Platform**
- Integration radio+ network

Phase I Core Technologies

**Phase 2 - Demos
PoC*- Core Techs
Components**

5G PPP Phase 3, Calls Specifics

5G PPP Phase 3 topics closing in 2018

	Title	Closing Dates
ICT-17-2018	5G End to End Facility	31 January 2018
ICT-22-2018	EU-China 5G Collaboration	
EUJ-02-2018	EU-Japan Joint Call - 5G and beyond	
EUK-02-2018	EU-Korea Joint Call - 5G	
ICT-18-2018	5G for cooperative, connected and automated mobility (CCAM)	17 April 2018
ICT-21-2018	EU-US Collaboration for advanced wireless platforms	
ICT-19-2019	Advanced 5G validation trials across multiple vertical industries	14 November 2018

ICT-17-2018: 5G end-to-end facility - general context

- Availability of Pan European platforms that can be used to validate in end to end manner the 5G KPI's, from the 5G PPP and beyond
- Critical to go beyond capabilities that can be demonstrated with running pre commercial trials of industry
- Novel features in relation to vertical, notably end-to-end slicing are of particular importance
- Platforms are to be reused by ICT 19 projects, in support of trials
- Open to support implementation of 5G AP trial roadmap
- Impact critical
- Open to support different stakeholders constellations

ICT-17-2018: 5G end-to-end facility - scope

- The target 5G end-to-end network facility covers fixed/multi radio access, backhaul, core network, service technologies and architectures targeted for 5G including end to end virtualisation and slicing as key component
- The objective is
 - to validate the 5G network KPIs through representative network trials, as defined by the 5G PPP
 - to prepare an extensive validation platform for verticals use cases

ICT-17-2018: 5G end-to-end facility - scope

The targeted facility

- allows to validate early versions of the standards and to prepare for later "forward compatible" versions
- may be based on the interworking of several experimental platforms existing in Europe
- requires availability of an openness framework (both legal and technical, e.g. open APIs) enabling "vertical" projects to access and use it
- requires a methodology to consistently compare technologies where appropriate

ICT-17-2018: 5G end-to-end facility - expected impact

- Demonstrated feasibility of **5G PPP KPIs beyond 4G evolution**. It requires clear analysis of the state of the art and how 5G goes beyond
- Demonstration of **innovative radio spectrum use** and sharing applicable to 5G spectrum: (un)-licensed, licensed-shared access
- Validation of a representative **end to end 5G architecture** including end to end service provisioning with slicing capabilities
- Impactful contribution to **standards**. Participation of key European industrial partners with high standardisation impact is desired
- Availability of 5G facility that may be further used for validation through specific **vertical use cases** and/or for **large scale showcasing** events

ICT-17-2018: 5G end-to-end facility

- Opening 31/10/2017
- **Closing 31/01/2018**
- Target is 3 to 4 projects
- Type of action: Research and Innovation action
- **Special conditions!**
 - The limit for a full proposal is 100 pages
 - Complementary grant agreements (through special clause 41.4):
One collaboration agreement to be signed by the 5G PPP projects aiming at, for example, → Joint definition of issues, → shared results, → common approach to standardisation and disseminations, ...

up to 60 M€

ICT-18-2018: 5G for cooperative, connected and automated mobility (CCAM) - general context

- Connected and Cooperative Assisted Mobility (CCAM) identified as a strategic industrial opportunity in the EU
 - 5G considered as the connectivity platform of choice (long term) for CCAM use cases
 - Member State support with Letter of Intent, signed at ministerial level in March 2017
 - European Automotive and Telecom Alliance (EATA) launched in September 2016
 - 5G Automotive Association (5GAA) launched in September 2016
- ➔ ICT 18 aims at validating 5G for CCAM in this wider techno-policy context

ICT-18-2018: 5G for cooperative, connected and automated mobility (CCAM) - scope

- Validation of 5G in a broad CCAM context is realised through cross border trials along 5G corridors
- Core technological innovation expected from 5G, such as (but not limited to):
 - New Radio, new frequency bands
 - C-RAN
 - Mobile Edge Computing
 - network virtualisation
 - new network architecture
 - cross domains data flows

ICT-18-2018: 5G for cooperative, connected and automated mobility (CCAM) - scope

- Define options for deployment, taking into account the evolution from earlier cellular technology (e.g. LTE-V2X), and possible co-existence with other technologies (e.g IEEE 802.11p)
- Includes cost/complexity assessment of the various technology deployment options. Identifies who has to invest and who will benefit commercially

ICT-18-2018: 5G for cooperative, connected and automated mobility (CCAM) - expected impact

- Validation of 5G technologies and architecture in an "extended CCAM" context
- Validated cost/benefit analysis of cross border 5G deployment enabling CCAM along 5G corridors potentially including several operator's domains
- Availability of deployment scenarios and strategies with broad base industry and administration consensus
- Identification of spectrum and standardisation gaps. Participation of key European industrial partners of both the ICT and the automotive sectors and with high standardisation impact is desired

ICT-18-2018: 5G for cooperative, connected and automated mobility (CCAM)

- Opening 31/10/2017
- **Closing 17/04/2018**
- Target is 2 to 4 projects
- Type of action: Innovation action
- **Special conditions!**
 - The limit for a full proposal is 100 pages
 - Complementary grant agreements (through special clause 41.4):
One collaboration agreement to be signed by the 5G PPP projects aiming at, for example, → Joint definition of issues, → shared results, → common approach to standardisation and disseminations, ...

up to 50 M€

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries - general context

- Trials and demonstrations are key to demonstrate 5G applicability to vertical industries and to prepare for mature cross sector business cases
- Trials may also be considered in support of the 5G AP Trial Roadmap developed under the 5G PPP
- 5G technology can only be validated in its fullest extent if used by several applications at the same time with different requirements (cloud like behaviour and isolation)
- Multi domain management of resources is important in such shared technology environments, including strong isolation and security aspects
- Trials expected to support later releases of 3G PP standards enabling full coverage of vertical requirements

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries - scope

Research and innovation action:

- Trials of various scales, depending on the target technology, demonstrating that performance conforming to 5G PPP KPIs requirements are met in the context of specific vertical use cases
- Technology/architecture trials targeting concurrent usage of resource by multiple verticals, addressing eMBB, mMTC, URLLC use cases
- To demonstrate that 5G architecture and technologies enabling multi domain management of resources are in line with concurrent vertical performance requirements
- Preferably implemented over the 5G end to end platforms developed under ICT-17-2018 and contribute to 5G demonstration in the context of large showcasing events

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries - scope

Coordination and support action:

- Cooperation of the implemented 5G Research and Innovation Actions (RIA) and Innovation Actions (IA) towards joint leveraging of results:
 - Management and orchestration of 5G PPP project cooperation for horizontal issues of common interests (e.g. KPIs, security, energy efficiency, spectrum, standardisation, societal impact of 5G)
 - Portfolio analysis, coverage, mapping and gap analysis, roadmaps
 - Support to key international co-operation activities (standards, spectrum)
 - Organisation of stakeholder events
 - Monitoring of the openness, fairness and transparency of the PPP process
 - Maintenance of the "5G web site"

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries - expected impact

Research and innovation action:

- Validated core 5G technologies and architectures in the context of specific vertical use cases and deployment scenarios and for differentiated performance requirements
- Viable business models for innovative digital use cases
- Impactful contributions towards standardisation bodies, involving vertical actors
- Validation of relevant KPIs linked to specific vertical sectors
- Europe 5G know how showcasing

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries - expected impact

Coordination and support action:

- Organisation of the 5G PPP as a programme
- Maximised output and exploitation of 5G PPP project results in key domains (standardisation, spectrum)
- Constituency building, stakeholder support, support to key international cooperation events and activities; dissemination, support to relevant stakeholder events; definition of future R&I actions

ICT-19-2019: Advanced 5G validation trials across multiple vertical industries

- Opening Early September 2018
- **Closing 14/11/2018**
- Target is 6 to 9 projects
- Type of action: Research and Innovation action (90 M€), Coordination and support action (2 M€)
- **Special conditions**
 - The limit for a full proposal is 100 pages
 - Complementary grant agreements (through special clause 41.4):
One collaboration agreement to be signed by the 5G PPP projects aiming at, for example, → Joint definition of issues, → shared results, → common approach to standardisation and disseminations, ...

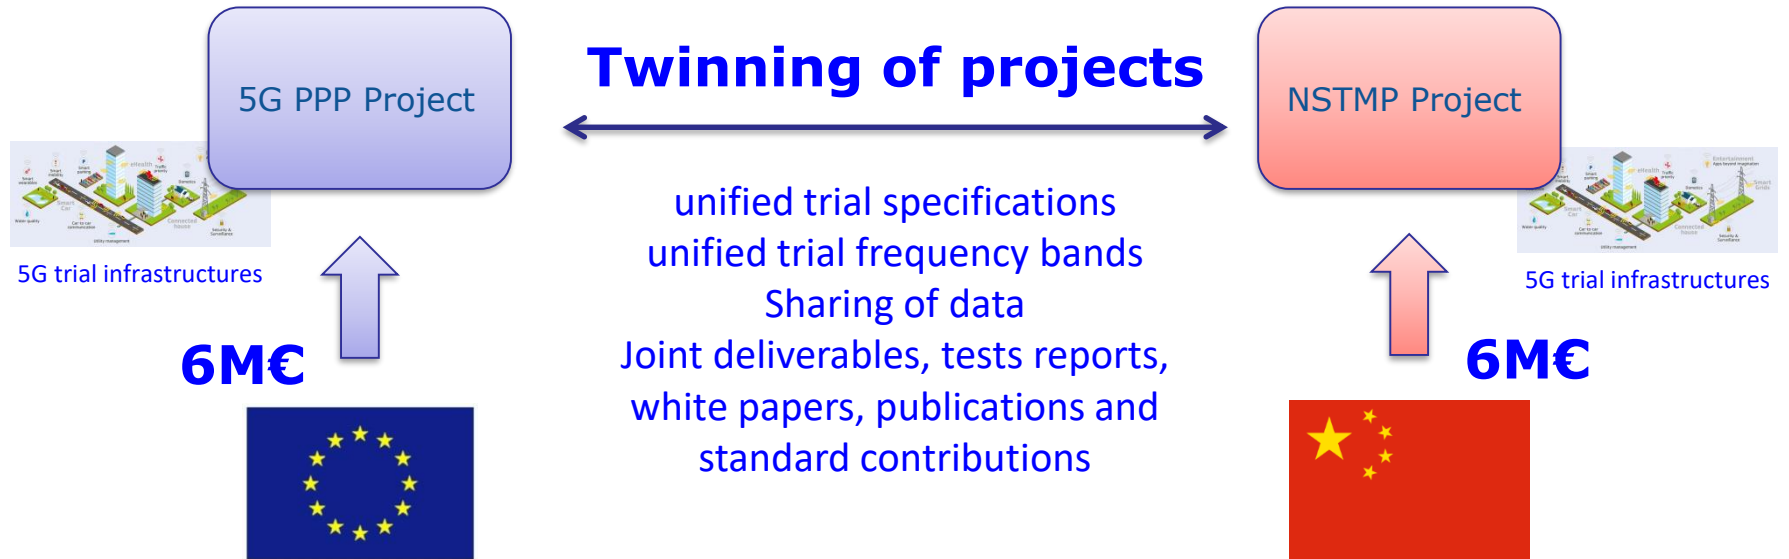

up to 92 M€

ICT-21-2018: EU-US collaboration for advanced wireless platforms (closing 17 April 2018)

- To establish EU US collaboration on advanced wireless research beyond 5G
- To develop notably research roadmaps, workshops, scientific exchanges, tools for experimentation, cross atlantic trials
- Proposals to foresee projects entities twinning, including NSF PAWR projects
- Expected impact: reinforced cooperation with the US in Wireless research towards beyond 5G connectivity systems and services
- Target: 1 CSA project (EU) with total funding up to 2 M€

ICT-22-2018: EU-China 5G collaboration

The National Science and Technology Major Project (NSTMP) is a main 5G research program in China

ICT-22-2018: EU-China 5G collaboration

(closing 31 January 2018)

- Conduct 5G trials addressing two specific scenarios: enhanced Mobile Broadband (eMBB) and Internet of Vehicles (IoV)
- Both scenarios shall be implemented in both regions (EU and China)
- Not restricted to 5G radio access, also for network slicing, virtualisation, cross-domain orchestration
- In EU, trials are preferably implemented over the 5G end-to-end platforms developed under ICT-17-2018.
- Expected Impact: Global interoperability demonstrations for 5G networks, Joint contributions to global 5G standards specifications, ...
- Target: 1 Research and Innovation action (EU) with total funding up to 6 M€

EUJ-02-2018: 5G and beyond (closing 31 January 2018)

- Part of the 4th EU-Japan Joint Call between EC, MIC and NICT
- Area 1: Large-scale demonstrations and trials towards 5G applications
 - Focus on trials and demonstrations of 5G applications in eMBB and Broadband Access in Dense Areas
- Area 2: Joint research on enabling technologies for beyond 5G
 - Focus on the enormous capacities foreseen to be needed in the backhaul and fronthaul networks
- Target: 2 Research and Innovation actions (1/area) with total funding up to 3 M€ (EU)
- **Check the special conditions!**

EUK-02-2018: 5G (closing 31 January 2018)

- Part of the 2nd EU-Korea Joint Call between EC and MSIP/IITP
- Area 1: mmwave and super broadband services
 - should include demonstration of 5G technologies for Access networks, Core networks
- Area 2: interoperability and integration of 5G vertical testbeds on heterogeneous environments
- Target: 2 Research and Innovation actions (1/area) with total funding up to 4 M€ (EU)
- **Check the special conditions!**

Future Foreseen Topics after 2018

ICT-20-2019-2020: 5G long term evolution (closing March 2019)

- The longer term vision targets the realisation of pervasive mobile virtual services
- 3 strands:
 - Extension of virtualisation technologies and architectures for Network Management
 - Security
 - Radio network enabling technologies, architectures and advanced signal processing
- Research and Innovation actions

ICT-23-2019: EU-Taiwan 5G collaboration

(closing 15 January 2019)

- Conduct 5G trials addressing technology and business validation of 5G end-to-end connectivity and associated management from applications in Taiwan
- Expected Impact
 - Validation of core 5G technologies and architectures in the context of specific vertical use cases
 - Leverage cooperation towards industrial consensus between EU and Taiwan
 - Accelerate the pre-commercialization trials of the use cases introduced by IMT-2020 (eMBB, mMTC, URLLC)
- Research and Innovation actions with total funding up to 4 M€
