

Team “Surfaces” – ISA (UMR 5280)

- Pr. Didier LEONARD didier.leonard@isa-lyon.fr +33 (0)4 37 42 35 54
 - ISA - UMR 5280 - Institut des Sciences Analytiques (academic)
 - Research AXIS : SMART (Surface and Miniaturisation for Analytical Research and Technology) - design and production of devices with specific surface properties for analytical chemistry, including in particular various types of micro/nano (bio) sensors, integrated or not into analytical microsystems
 - Team Surfaces : surface analysis and surface modification
- « Surfaces » has been taking part in more than 12 collaborative projects (6 ANR, 4 FUI, 1 Feder, 1 ISI,...) in the last 10 years

Team “Surfaces” – ISA (UMR 5280)

development of surface analysis methodologies

large set of surface analysis techniques (spectroscopy, microscopy, wettability)

Frequent and ongoing collaboration with SCIENCE et SURFACE

ToF-SIMS

XPS - AES

SEM-EPMA

AFM

SURFACES

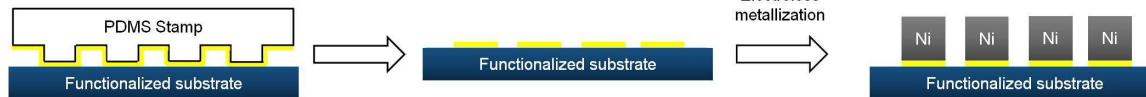

Surface analysis
and surface
modification

RF plasma

MW plasma

Soft
Lithography

development of original simple and cost effective methodologies for tailored micro-nano-structuration of materials on the basis of surface modification processes (chemical, electrochemical, plasma, etc.) and soft lithography techniques
