- *Organisation competencies*
 - **Physical and logical global risk modelling methods and tools**
 - **Complex physical and cyber interdependency modelling, surveillance and improving processes**
 - **Cause and effects risk modelling**
 - **Intelligent methods and system for surveillance of inaccessible parameters for risk prevention and mitigation**
 - **Generation, propagation and fusion of risk alerts: weak signals, support elements alerts, essential elements alerts, feared events alerts.**
- *Organisation experience in the European project*
 - **FP6 project "Contract-based Air Transportation System" (via AFC)**
 - **FP6 project "System Wide Information Management " (via AFC)**
- *The skills we can bring*
 - **Artificial Intelligence, Data fusion, Data mining, Data driving**
 - **Deep learning, Neural Networks, Advanced Machine Learning**
 - **Heterogeneous data, signal, image and video processing**
 - **Clustering, pattern recognition and identification**
 - **Detection of behavior change**
 - **Robust prediction of complex systemic behavior**
 - **Algorithms and methods**
