INERIS & INERIS DEVELOPMENT

Ressources and contributions

- **Multi-disciplinary expertise on safety, security, prevention on threats concerning critical infrastructures (Seveso)**
 - Ability to gather a large networks of international experts through ETPIS, EU-VRi and other international groups
 - Relations with the key stakeholders: public authorities, industrials and industrial associations, NGOs, normalisation organisms, professional unions, ...
- **Contributions**
 - Bring an international dimension in the projects
 - Set up and animate an International Advisory Board
 - Organise benchmarks and comparative studies between several countries practices
 - Coordinate the dissemination and valorisation of the results through the networks

ETPIS & EU-VRI

- **An instrument to pilot research on industrial safety and to share good practices**
 - A “think tank” for research programming
 - A network to develop projects and technological or services solutions
 - A platform regrouping the stakeholders for exchanges (dissemination, professional information, consultations from the European Commission)

- **The company managing ETPIS and a virtual institute regrouping 55 organisations working in safety and security issues**
 - Organise and coordinate the activities from ETPIS in collaboration with the Executive Committee and the High Level Group
 - Coordinate and contribute to projects and studies on industrial safety and malicious threats
