
Shift2Rail - Calls 2019
EU Plenary and Brokerage Event
29th November 2018
Strasbourg – France
Maison de la Région
1 Place Adrien Zeller

Enterprise Europe Network (EEN) partners (Grand E-nov, Berlin Partner for Business and Technology), French and German Transport National Contact Points (NCPs) co-organise an EU Brokerage Event on Shift2Rail Calls for proposals 2019.

The event is aimed at any stakeholder interested in research and innovation and solutions adapted to the market demand. The new S2R MAAP 2017 clarifies the vision and its contribution to the European societal goals. A series of intermediate steps to improve the railway system will be taken through the development and implementation of the R&I activities planned in the MAAP, while capturing new technologies.

The upcoming new S2R activities should produce

- either demonstration with prototypes of new technologies into operation or test facilities ;
- or supporting activities with lower Technology Readiness Level, based on new emerging concepts and coming from the digital world, basic science or elsewhere, to pave the way for future research and innovation.

The objective of this Brokerage event is two-fold:

- A morning dedicated to a plenary session in order to present :
 - ✓ The latest developments of the joint undertaking Shift2Rail ;
 - ✓ The Annual Work Plan for 2019 including the calls for proposals for non-JU members (or open calls) ;
- An afternoon reserved to B2B meetings.

The planned publication date of the 2019 calls is sometime during the first half of 2019, but no later than mid-2019. The scheduled closing date should be for the beginning of the fourth quarter 2019.

Programme

08.30	Welcome coffee and Registration	
09.30	Welcome	<p>Lilla Merabet Vice-President Competitiveness, Innovation & Digital - Grand Est Region</p> <p>From Grand E-nov & EEN: - Jean-Jacques Bernardini – Head of European Affairs - Isabelle Gouriou – Innovation Advisor French & German NCPs : - Marie-Françoise Sherratt-Roux - Ifsttar - David Doerr - TÜV Rheinland</p>
