- (*) Relevant topic in work programme

• LC-SC3-SCC-1-2018-2019-2020

- Quick description of the project

TOMARO is building a software platform to empower any part of territories feeded by new energy sources to activate automatically available levers of flexibility on a defined perimeter in order to keep a permanent synchronization and so, delivering a high level of QoS to users. We are looking for partnerships with such territories in order to realize positive-energy blocks/districts that can be gradually scaled up to city level : European lighthouse cities.

- (*) Description of the expertise requested (up to 1000 characters)

Lighthouse Cities will closely collaborate with the Follower Cities and should act as exemplars helping to plan and initiate the replication of the deployed solutions in the Follower cities, adapted to different local conditions.

- Keywords describing the expertise requested (up to 10 words)

• Replication, collaboration, lighthouse, commitment, greentech,

Organisation information
