

Partner search

Date 6th May 2019

- (*) **Relevant topic in work programme**

- We are searching for some partners interested in the call LC-SC3-EC1-2019 in order to elaborate a new technological project that would put the consumer at the center of the project and help at the same time the energy transition.

-

- **Quick description of the project**

- The goal of this project is to create a micro-grid of production but also of consumption by using photovoltaic panels for the inhabitants of a district, based on a voluntary form. The aim of this project is to put the consumer at the center of this system, to reverse the current tendencies, and to make consumers becoming aware of the positive impact which they can have on the environment but also towards our economic market.

- (*) **Description of the expertise requested (up to 1000 characters)**

We are searching experts in consumers' behavior in order to understand them better and adapt our project to different case, we are searching for some sociologist to help us building studies, we are searching also for law expert because of the legal barriers and law that are currently existing to understand them better and look at the different obstacles that could enter in the implementation of the project.

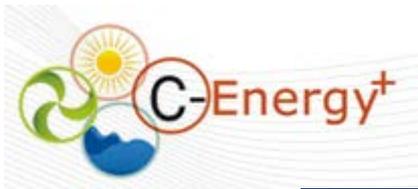

-

- **Keywords describing the expertise requested (up to 10 words)**

- Sociologist
- Law specialist
