Upgrading building's energy performance and smartness

LC-SC3-EE-1-2018-2019-2020: Decarbonisation of the EU building stock: innovative approaches and affordable solutions changing the market for buildings renovation

- **Quick description of the project**

Issue: upgrading energy efficiency over a scale of 4000 social housing, all in individual or detached houses, over the next 10 years, in an area where 44% of households are in energy poverty.

- (*) **Description of the expertise proposed (up to 1000 characters)**

- The financial incentives are in place, as the criterias for ensuring the quality of the renovations. The program is part of a larger regional program covering 23000 housing to be refurbished over the next 10 years.
- A chain of partner organization has been set up so as to train the existing and future workforce in EE buildings
- A partnership has been built to help local building companies to respond to the tenders over the next ten years
- A cluster around EE building is active and has been for 17 years on the whole regional territory

- **Keywords describing the expertise requested (up to 10 words)**

- We are offering our ground of action, on a very significant scale, to researchers and innovators in the field of EE building that would help us look into the integration of a better energy mix and /or renovation methods that would be less stress for the tenants and faster to set in place.
