

## **CEA-LIST Data Intelligence Group:**

research focused on AI methods & Data Science with operational constraints

## **Targeted (sub)topics:**

SU-DS02-2020: Intelligent security and privacy management

(b): Cyber-threat information sharing and analytics

(c): Advanced security and privacy solutions for end users or software developers

(d): Distributed trust management and digital identity solutions

**SU-DS04-2018-2020: Cybersecurity in the Electrical Power and Energy System (EPES): an armour against cyber and privacy attacks and data breaches**

**SU-INFRA01-2018-2019-2020: Prevention, detection, response and mitigation of combined physical and cyber threats to critical infrastructure in Europe**

**Contact:**

**Nizar Touleimat**

**+33 (0) 678 977 886**

## Skills we can bring

1. Machine learning and differential privacy: offer machine learning-based services while ensuring privacy of training datasets (e.g. PTClust algorithm for private clustering, published in UAI 2018).
2. Defense against adversarial attacks in artificial intelligence (CEA@CES 2020)
3. Behaviour modelling for anomaly detection (graph-based approaches spatio-temporal point processes)
4. Energy related issues: distributed approaches for electrical interconnected networks

## Experience in “security related” EU projects:

- EURITRACK
- C-BORD
- RESPONDRONE
- SAFEWATER
- ...
