

COVER

Being safe around collaborative
and versatile robots
in shared spaces

safearoundrobots.com

Action: H2020 ICT-2017-27c – Robotics Innovation action

Duration: January 2018 – December 2021

Budget: €10.7M

Ambition

Perimeter :

robot technology sharing space with humans

excluded: *drones, autonomous road vehicles, military use, intracorporeal*

Application domains :

- *Manufacturing*
- *Logistics*
- *Rehabilitation*
- *Agriculture*

- **Significantly reduce the complexity** in safety certifying cobots.
- **Establish open COVR toolkit** to determine exactly which validation procedures are necessary for safety certification.
- **Develop testing protocols**
- **Create network of cobot test hubs** across Europe.

COVER

SHARED SAFETY FACILITIES

= COVR partners

DANISH TECHNOLOGICAL INSTITUTE

Fraunhofer IFF

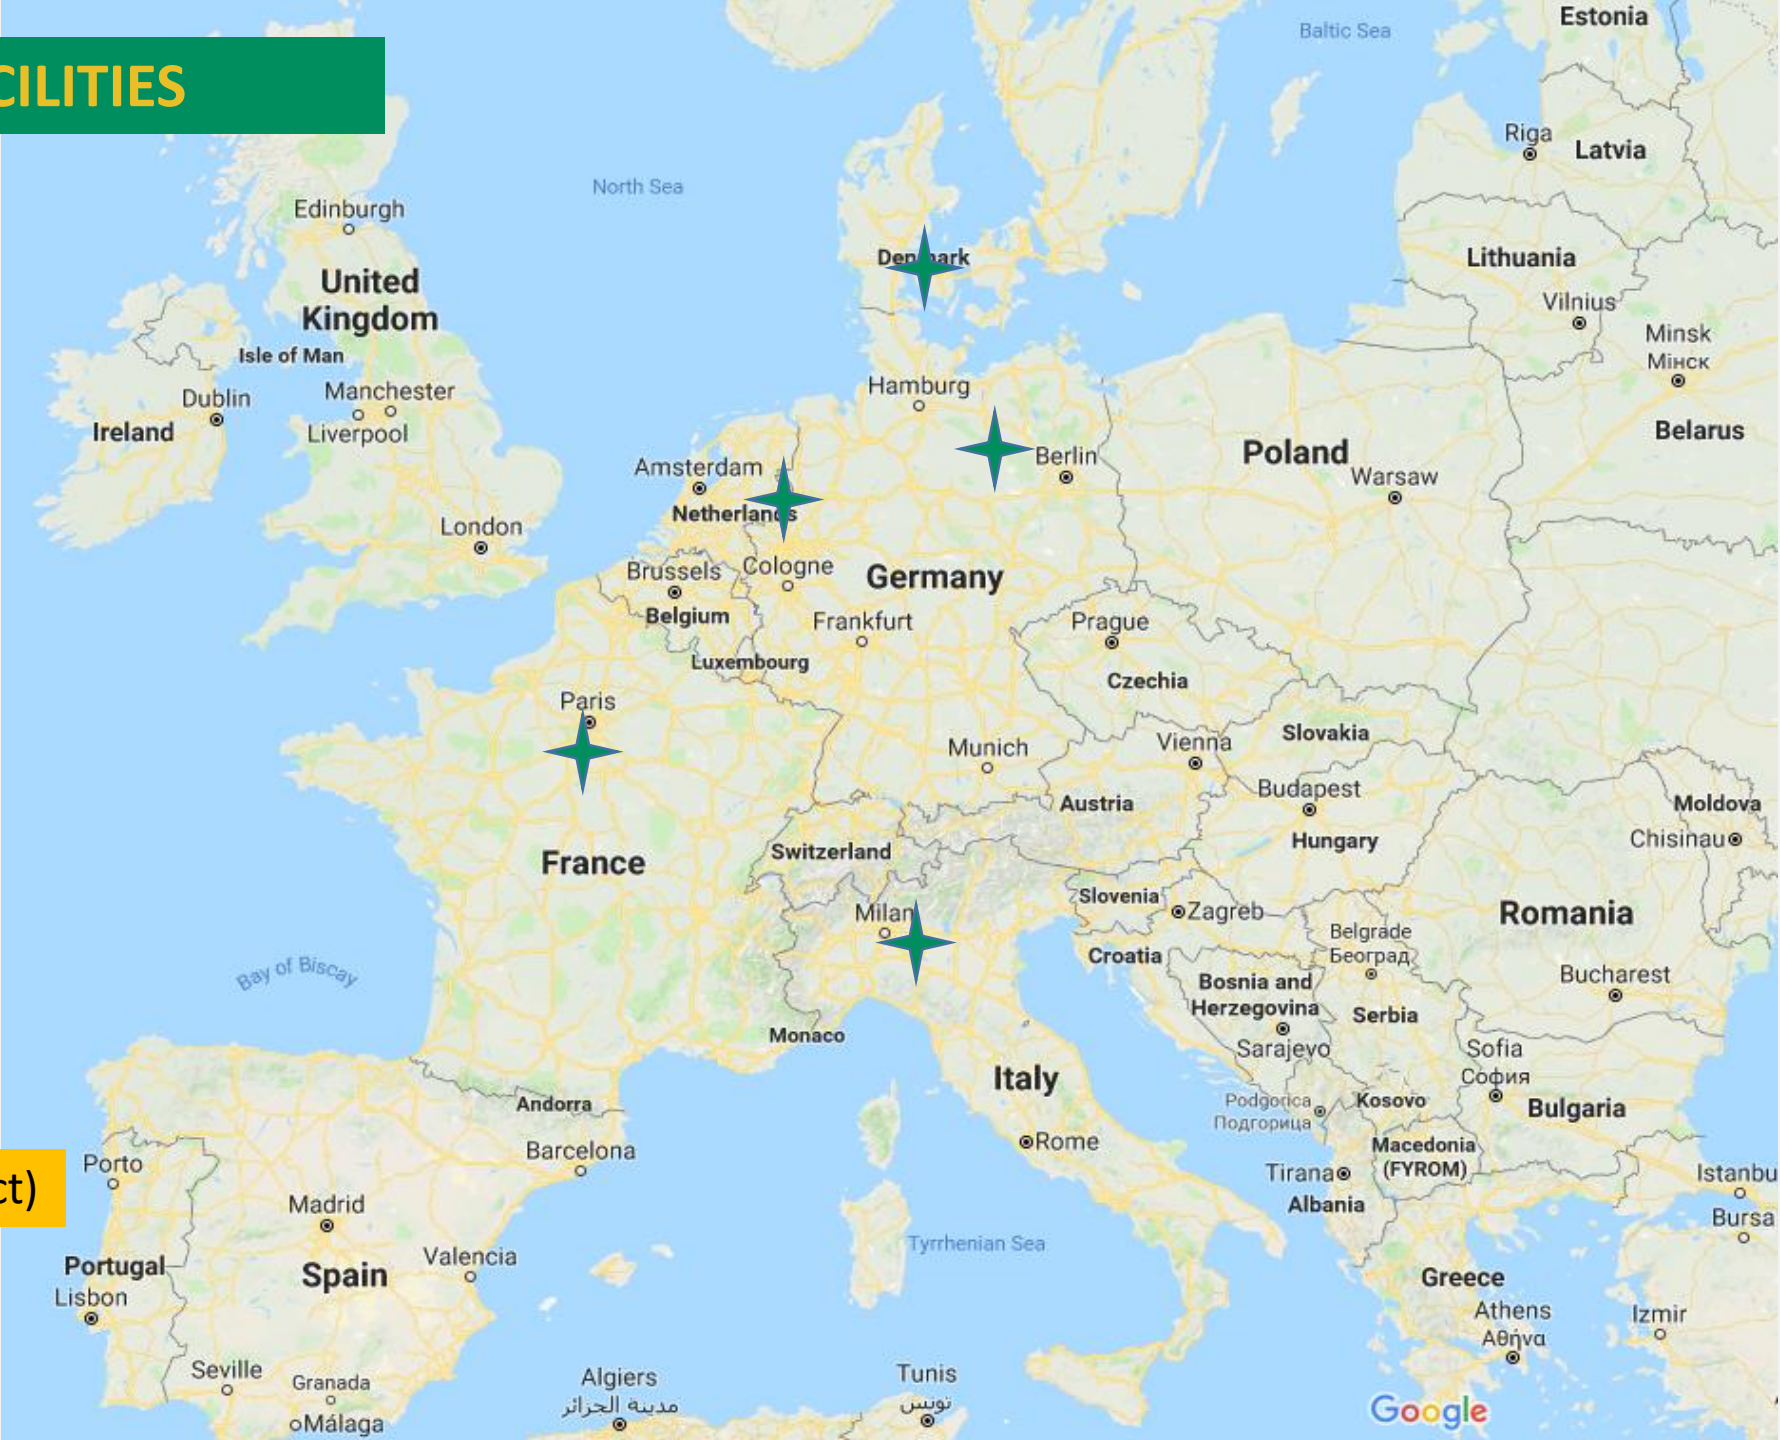

Istituto di Tecnologie Industriali e Automazione Consiglio Nazionale delle Ricerche

cea

Roessingh Research and Development

→ extension (after the H2020 project)

COVER

FSTP OBJECTIVES

To support the development, certification and deployment of a cobot or cobot integration by increasing its perceived and/or real safety

- **Test and measure safe limits**
- **Develop technology**
- **Develop testing protocols and methods**

Beta-test and enrich the COVR toolkit and testing protocols

- **5M€ in financial support** to 3rd party cobot development
 - 60k€ maximum per project/entity
 - 100k€ maximum per entity when in several projects
- **Access to shared safety facilities (SSF)** at partner sites
- Access to **COVR Toolkit** in its current version

❖ *Eligibility:*

legal entity based in an EU Member State or associated country individually or in a consortium

**SUPPORT
provided by
COVR
AWARDS**

- **Design and installation of pilot cobot systems** (up to TRL 8)
 - including hazard identification and elimination, risk assessment and reduction
 - including safety evaluation and testing on the (industrial/rehab.) field
- **Development of safety systems**
 - including redesign, design improvement for safety
 - including lab and/or field tests
- **Development of a cobot, collaborative robot**
 - including development and testing of safety functions

COVER

AWARDS
eligible work

AWARD Requirements

- Attend a COVR workshop
 - toolkit introduction
 - protocols introduction
 - Document their experience
 - Continuous communication with ARP
 - End-of-experiment report
 - Contribute to COVR elements improvement
 - Present their experience in one COVR event
 - Support COVR making of dissemination material
 - including videos
- + funding rules
- + SSF safety and internal rules

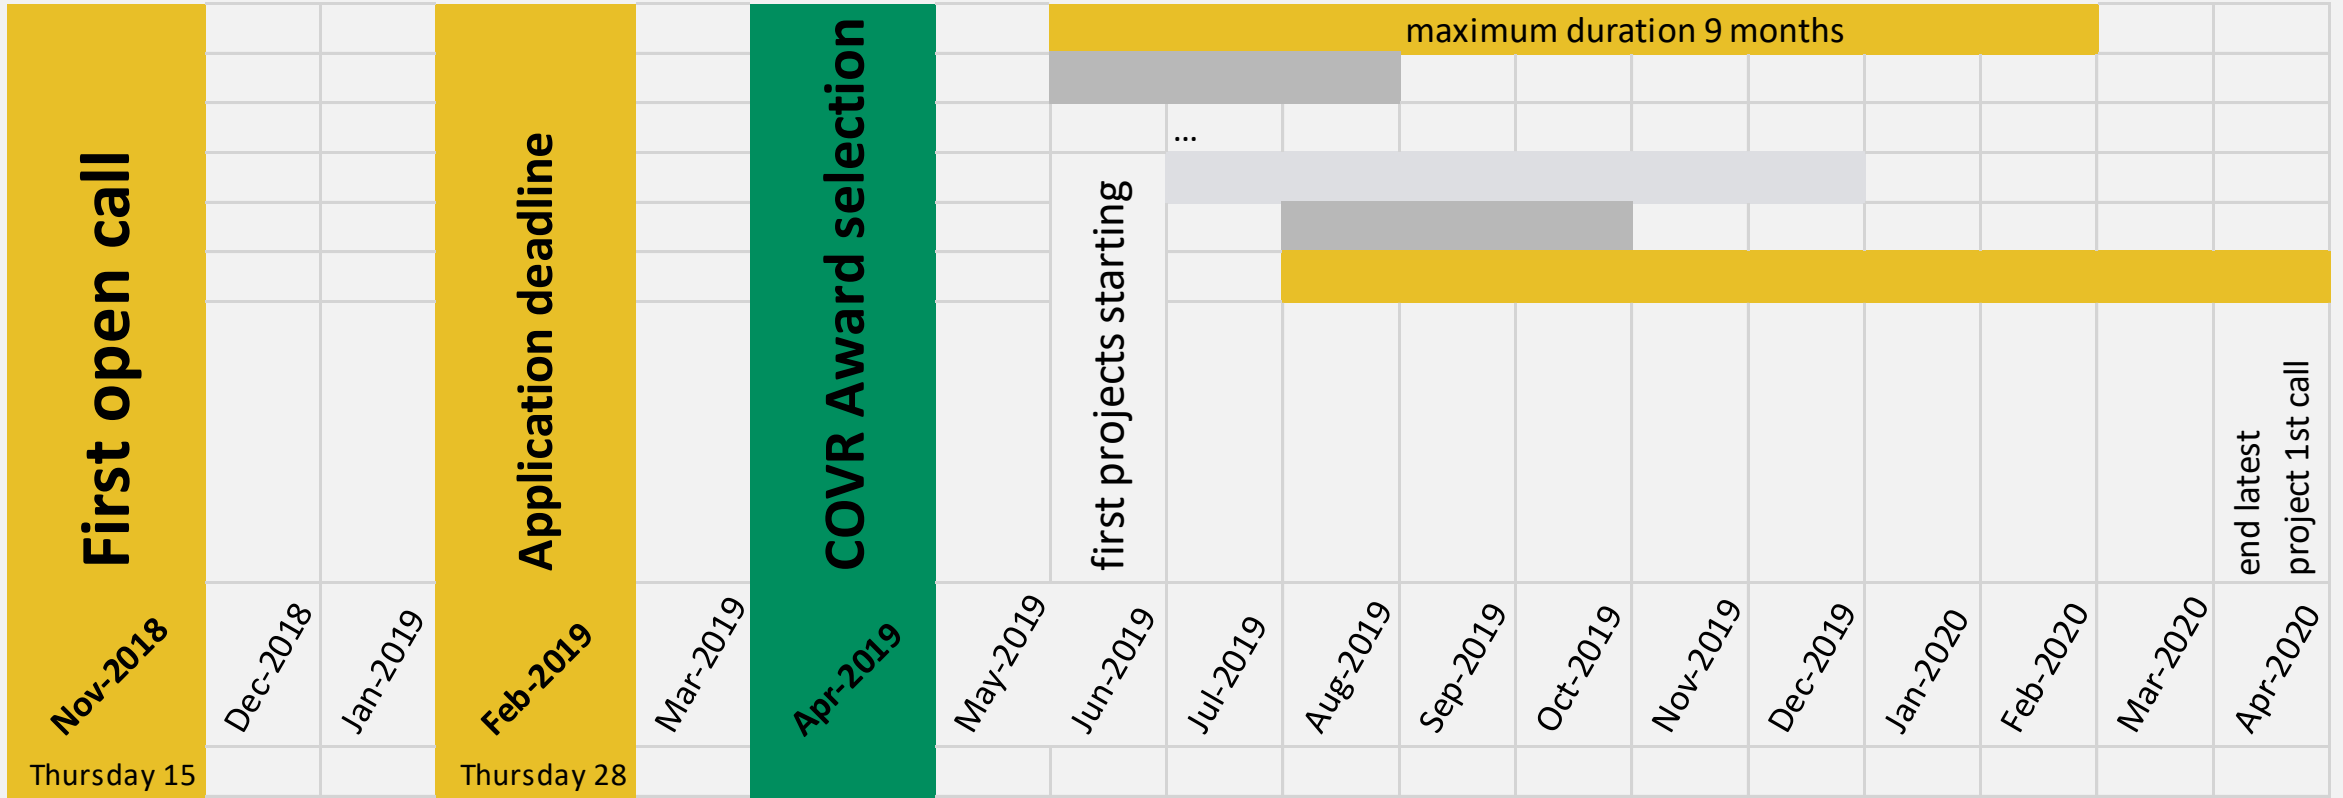

- Impact / COVR objectives
- Quality of work described
- Technology readiness
- Coverage constraints
 - Use Toolkit in its version: Manufacturing (1st), rehabilitation (2nd),
 - Robot abilities → COVR protocols
 - Type of human-robot collaboration, technologies
 - Application domain: manufacturing, rehabilitation, logistics, agriculture
