1) PROJECT INFORMATION

Field of expertise related to the topic: Among the scientific areas of the Tunis Science City, “DNA for All Espace” is dedicated to the large public. Pupils, students, secondary school teachers, university professors, researchers, scientific police staff, as well as any ordinary citizen, can work in this space. Citizen will have the opportunity to know more about the latest scientific advances through attending lectures, participating in training sessions and celebrating international days organized in collaboration with other partners such as scientific associations and research centers. In partnership with AcaROBOTICS Start-up and EDUROBOT Association, the Tunis Science City launched robotics clubs. The participants have the opportunity to learn more about an innovative academic technology, designed to integrate academic disciplines, like for example computer

science, through didactic and technological robotics projects.

The city celebrates international days in collaboration with specific partners in the scientific and space field in order to present to participants the latest scientific research with a popularized way.

Potential contribution to the project: Create scientific activities (workshops, conferences, speed dating, science shows, hands-on experiment, etc.) in collaboration with educational providers, companies, government and international institutions in order to:
Disseminating and popularizing the scientific culture learn more about the basic scientific principles, discover more about the world of scientific research through experiments.

Role in the project:

☐ Research
 ☒ Dissemination
 ☐ Other
☒ Training
 ☐ Technology Development

Project idea: support a range of activities based on collaboration between formal, non-formal and informal science education providers, enterprises and civil society in order to integrate the concept of open schooling, including all educational levels, in science education.

Project description: Through national and international partnerships, this project consists in bringing the sciences with an informal and non-formal way to the vulnerable citizen. The main tools used in this project are participatory and popular science.
