Short profile of the Organisation: The Order of Pharmacists of Albania is an organisation that since 2006 provide Continuing Education activities in national level valid for pharmacists and other health specialists all over Albania.

Nowadays there has been an increase awareness among health specialists regarding the rationale use of drugs, specially OTC ones. We'd like to expand this campaign among all citizens and specially among young people range 16-22 years old at school or university. It is very important to bring pharmaceutical science into schools and engage youngsters in research and collaboration for rationale use of drugs in Albania.

We have our structures and experts to do this. OPhA uses different methods of training onsite and distance learning programs. Being part of a wider project will be an opportunity to realize this objective.
