Call:

Science with and for Society

SwafS-07-2016: Training on Open Science in the European Research Area

SwafS-16-2016: Mapping the Ethics and Research Integrity Normative Framework

SwafS-03-2016-2017: Support to research organisations to implement gender equality plans

SwafS-19-2016: Networking of National representatives and resources centres on Gender in R&I

SwafS-23-2017: Responsible Research and Innovation (RRI) in support of sustainability and governance, taking account of the international context

Offer valid until:

1 Project Information

Activity of the SwafS work Programme concerned: :

Institutional change to support Responsible Research and Innovation in research performing and funding organisations

Developing inclusive, anticipatory governance for Research and Innovation

Field of expertise related to the topic:

R&D Management and evaluation, scientometrics & webometric studies, e-Infrastructure development, Open access, open data, R&D Analytics, statistics and assessment.

Potential Contribution to the project:

Our main contribution can be in the field of conducting comprehensive mapping and analysis of the national R&D sector, in terms of ethics/integrity normative framework, gender bias and promoting Open Science in the national R&D community.

ISDI researchers are experts in ERAWATCH and international programs, members of FP7 ICT committee, EuroScience; we have performed joint projects with research institutions from the EU, CIS and other countries.

ISDI researchers have experience of participating in studies focused on R&D evaluation with European partners, e.g. ISDI in collaboration with Zentrum für Soziale Innovation (Vienna) in the frame of FP7 IncoNet EECA project have performed evaluation of the current status of S&T statistics in EECA countries, inclusively a case study for Moldova and of the policy mix that influence research and innovation within the ERAWATCH and PRO INNO Europe.

ISDI has experience in developing databases of scientific publications, performing studies regarding the release and dissemination of scientific results, evaluating the impact of national scientific publications, using, among others, altmetric indicators. ISDI being the owner of databases regarding national scientific results, can ensure their use for performing country study cases etc.

ISDI can organise and host project events, ensuring a wide attendance of various national stakeholders (government, academia and business), as well as provide experience in developing project promotional and dissemination materials.

Role in the project

- Research
 Dissemination
 Other
 Training
 Technology development

Project idea:

To join a European-wide consortium of experts to exchange knowledge and best practices in order to develop a project towards supporting Open Science, RRI or gender equality.

Project description:

The prospective project can be about:

- increasing the knowledge on open science related issues,
- facilitate the work of the researchers to comply with research integrity and ethics standards and legislation, based on comprehensive mapping of ethics/integrity normative framework,
- conducting relevant assessment in order to identify gender bias at organisation level and implementing effective strategies to address gender bias, thus supporting organisations to implement gender equality plans.

Already experience as a coordinator yes no or partner yes no

If yes, in which projects?

As a subcontractor in EXTEND, SEERA-EI and MOLD-ERA FP7 projects.

Other partners in the consortium already identified (with their countries):

2 Target Coordinator/Partner Sought
