1) PROJECT INFORMATION
Field of expertise related to the topic: Humanties, Cultural Heritage, Citizen Science
Potential contribution to the project: The Digital Humanities program and the e-Lijah Lab at the university of Haifa are interested in joining a consortium in the areas applying citizen sciences solutions for Digital Heritage preservation and access. In the recent years the lab played a key role in international projects for developing and running platforms for combining machine learning and citizen science for transcriptions of medieval manuscripts. We gathered experience in bringing together domain experts from the humanities with Information Systems experts in the areas of human interface and computer interaction and crows sourcing. The University of Haifa runs the

first BSc program in DH, forming a body of experts enabling expansion of our citizen science work to other areas of the humanities and cultural heritage, including historical documents, virtual atlases, museums and more.
