Technologies Futures et Emergentes

- Eléments statistiques du 7^{ème} PCRD
- FET dans H2020
- Le programme de travail FET
- Modalités de soumission
- Evaluation
- Calendrier et budget

Le programme FET ?

- ❑ Un programme initié il y a 24 ans
- ❑ Géré par la DG-CONNECT
- ❑ Historiquement la partie « amont » du programme TIC traditionnel :

Pathfinding Europe's technological future

- ❑ Quelques mots-clés: *nursery of novel and emerging scientific ideas, high-risk, with potential significant societal or industrial impact, multidisciplinary, interdisciplinary*

The sower, Vincent van Gogh

STATISTIQUES DU 7^{ÈME} PCRD

Les principaux pays bénéficiaires

FR 4^{ème} bénéficiaire du programme derrière DE, UK, IT
Retour FR global de 10,9% (vs. contribution UE de 17%)
Tendance forte à la baisse: 13,1% en 2007; 10,3% en 2009; 8,7% en 2011

Source: projets signés 06/13 et propositions retenues en cours de négociation

Les principaux pays participants

- Un déficit de participation française par rapport aux autres pays... semblable à celui rencontré sur les autres appels du 7^{ème} PCRDT

FR 5^{ème} participant
FR a demandé 8,8% des contributions totales
Soit 60% seulement des demandes DE

Une évolution de la participation FR sur FET Open

FR 3ème bénéficiaire sur FET Open...
Mais avec une forte tendance à la baisse

Principaux organismes bénéficiaires (UE)

LE PROGRAMME FET DANS HORIZON 2020

Un programme **unique** où sont réunis trois programmes et initiatives jusqu'à présent séparés.

2014-2020

2007-2013

Trois priorités/piliers

H2020 : Le pilier Excellence

24,4 Md€

ERC
(13,1 Md€)

Actions Marie-Curie
(6,2 Md€)

FET
(2,7 Md€)

Infrastructures
(2,5 Md€)

FET in Horizon 2020

"**Future and emerging technologies** shall support collaborative research in order to extend Europe's capacity for advanced and paradigm-changing innovation. It shall foster scientific collaboration across disciplines on radically new, high-risk ideas and accelerate development of the most promising emerging areas of science and technology as well as the Union wide structuring of the corresponding scientific communities."

COMMISSION PROPOSAL ON ESTABLISHING HORIZON 2020 - THE FRAMEWORK PROGRAMME FOR RESEARCH AND INNOVATION (2014-2020)

Le projet de programme de travail 2014-2015

- Adopté le 12 novembre par les Etats Membres
- Mise en ligne sur le site Horizon2020

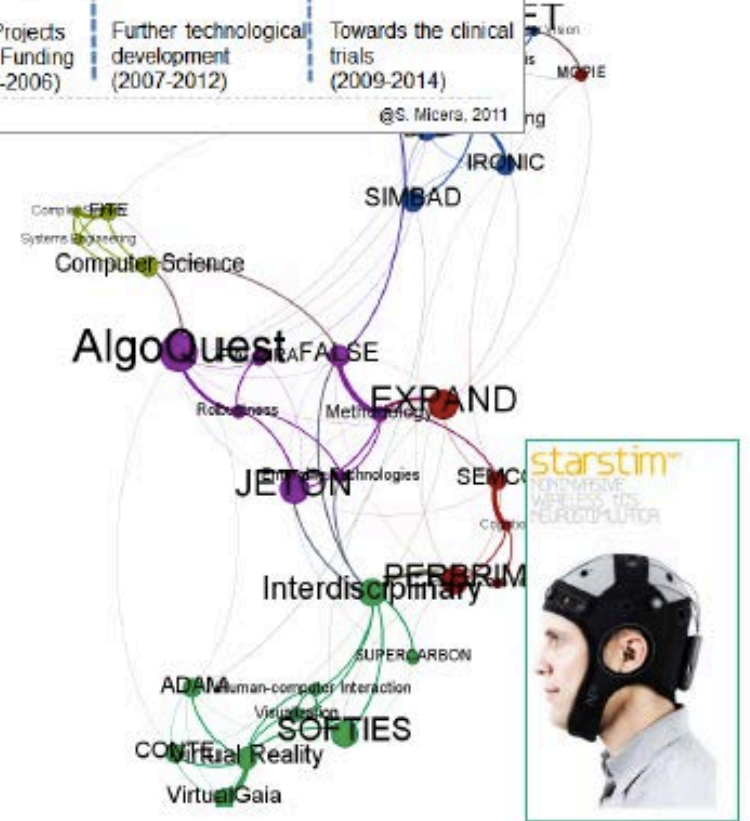

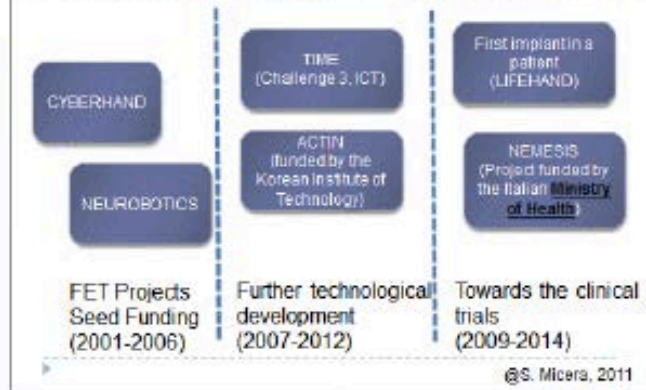

<http://www.horizon2020.gouv.fr/>

- Présenté lors de la Journée nationale d'information FET le mercredi 4 décembre à 14h au MESR

FET Open

- + Popular FET-hallmark scheme
- + Numerous success stories
- + Attracts new disciplines and actors, including many young ones and SMEs
- + A source of new directions and early signals
- + Largely academic, with some high-tech industry and SME participation
- + Highly competitive!

From "seed funding" to "clinical trials":
the CYBERHAND case (peripheral implantable interfaces)

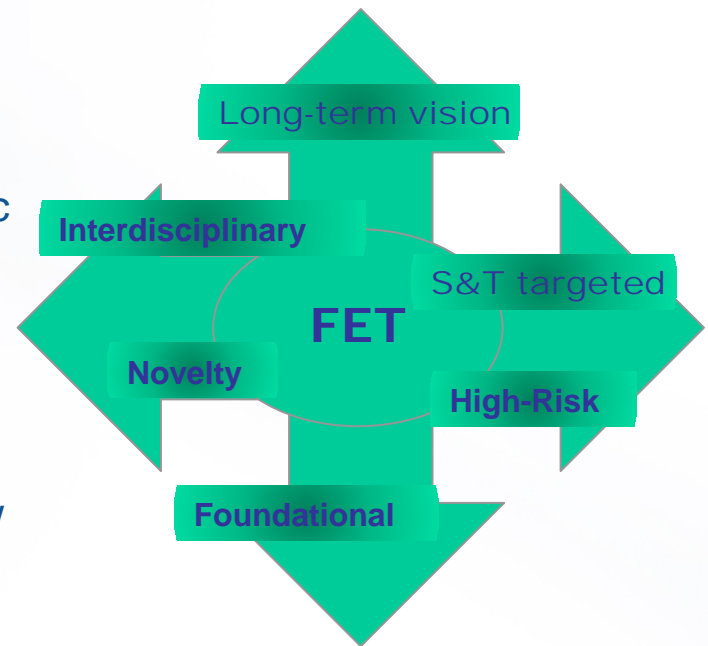

FET Open: fostering novel ideas

'Open is open': [all technologies](#), no other topical scope limitation.

40% of the FET budget in H2020 (>1B€ as of September 2013).

FET gatekeepers define the kind of research that FET is looking for.

- *Overall goal – contribute to innovation by:*
 - Encouraging the application of existing scientific knowledge to solve technological problems
 - Facilitating new scientific research to fill today's gaps in technology
 - Supporting the development of expertise in new technological areas within the EU

FET Open: fostering novel ideas

'Open is open': [all technologies](#), no other topical scope limitation.

[40% of the FET budget](#) in H2020 (>1B€ as of September 2013).

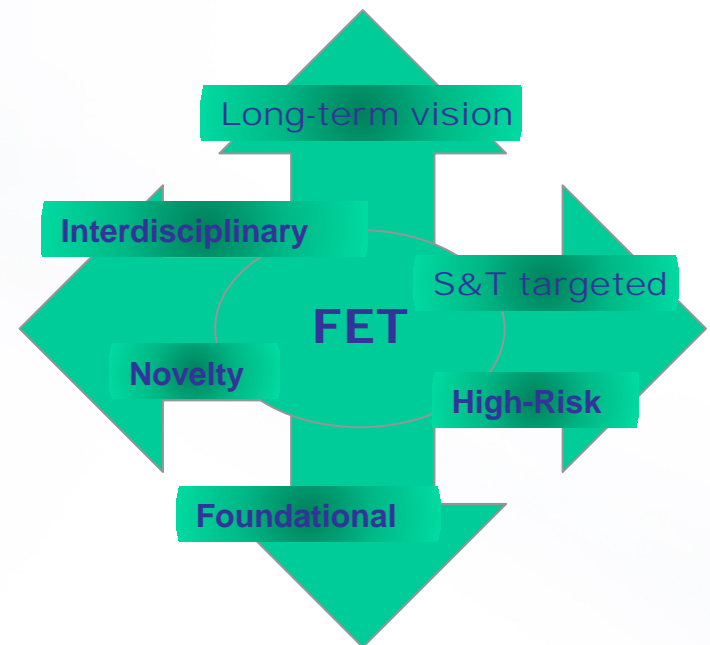

[FET gatekeepers](#) define the kind of research that FET is looking for.

- *An end-to-end fast and light scheme*

- 15 pages proposal
- 1 step submission, 1 step evaluation
- 3 evaluation criteria

Instruments

- Research and Innovation Actions
- Cordination and support Activities

FET Proactive - nurturing emerging themes and communities

A set of thematic initiatives on promising emerging research themes.

Building up a European pool of knowledge and new interdisciplinary communities.

Joint exploration or consolidation of promising future technologies.

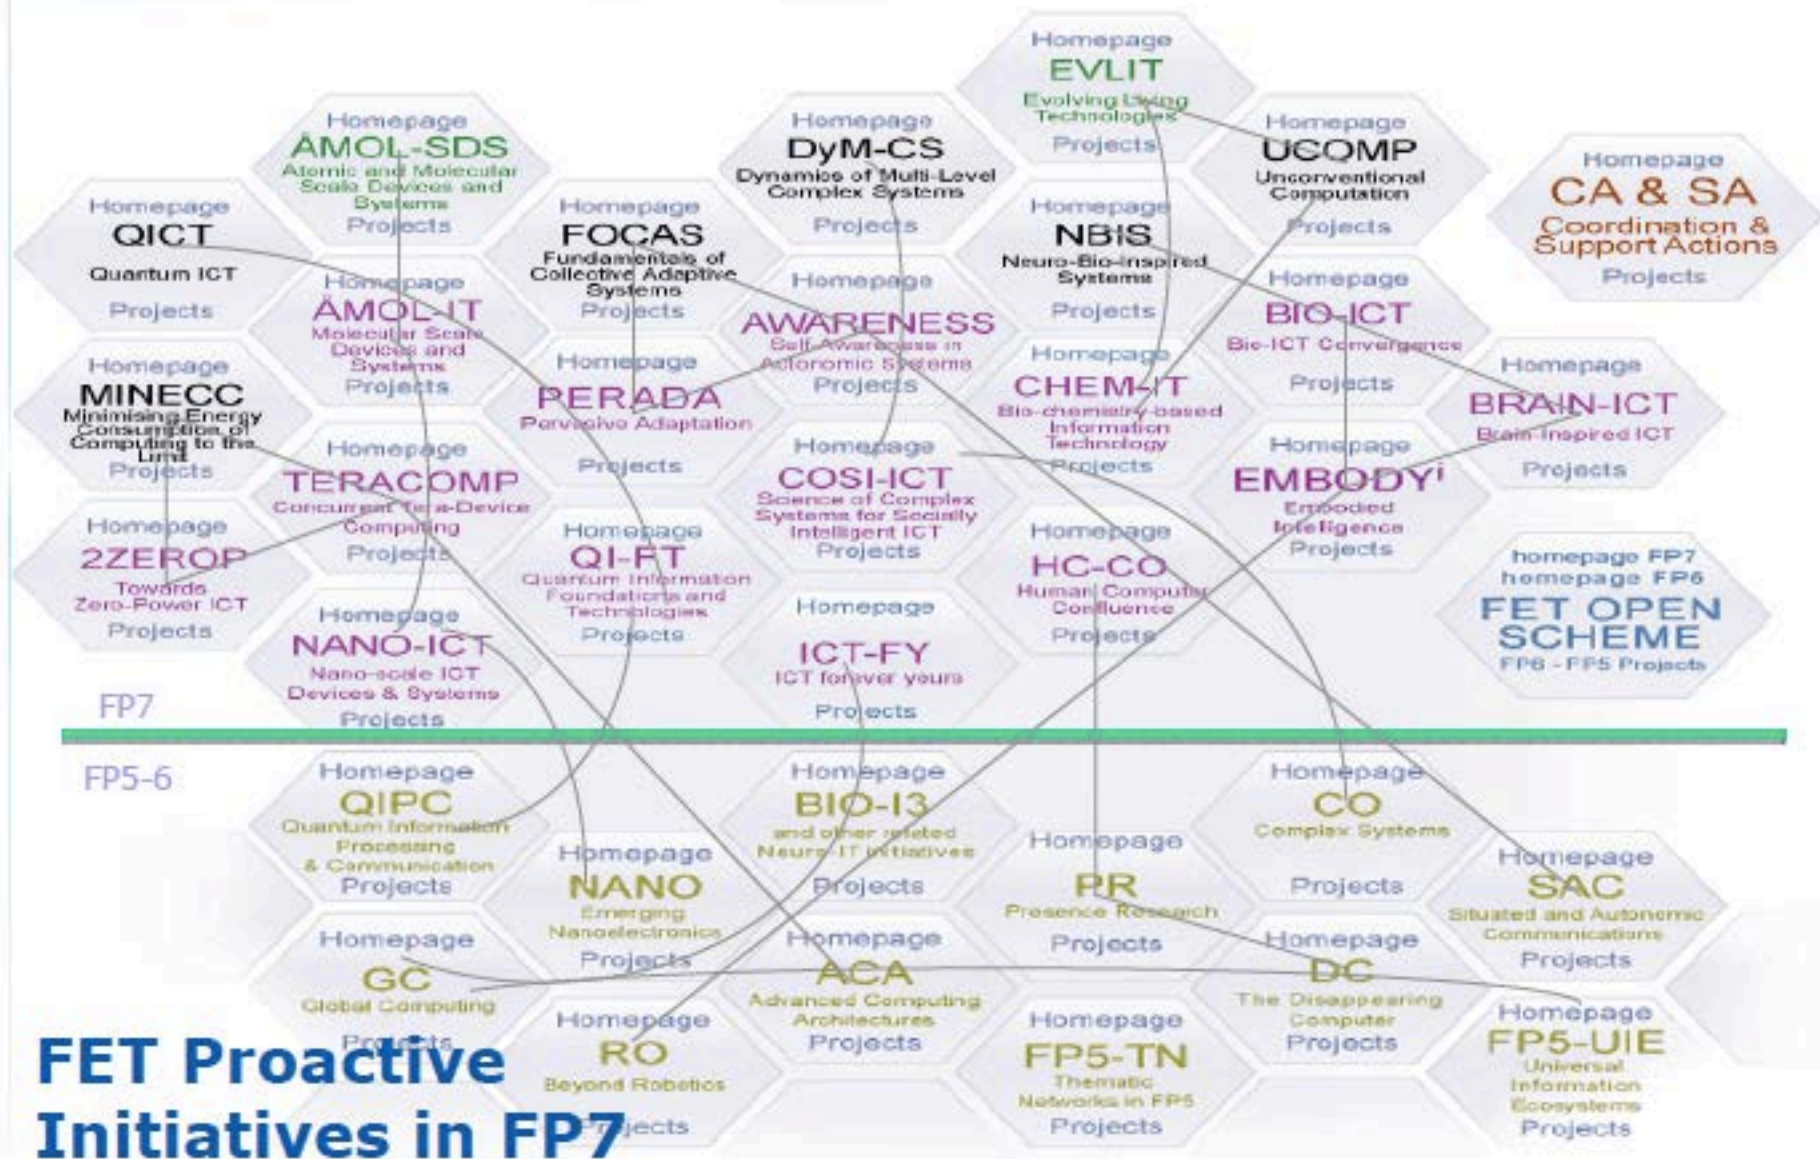

Topics defined bottom-up (FET Observatory):

FET-Open portfolio analysis

Consultations

Participatory engagement with industry and society

Coordination and support actions

FET Proactive Initiatives in FP7

+ Balance between continuity and new directions

+ It can take time to mature an avenue

+ Creation of communities

+ for instance in, Bio-ICT, quantum technologies, Neuro-IT, complex systems

+ Successful transfers

+ for instance in quantum cryptography, cognition, nano-tech, robotics, bio-ICT

FET Proactive

FET Proactives

Three topics are selected for funding in WP2014-15:

- **Global Systems Science (GSS)**
- **Knowing, doing and being: cognition beyond problem solving**
- **Quantum Simulation**

Complemented by a special action:

Towards exascale high-performance computing, as part of the High Performance Computing Public-Private Partnership (ETP4HPC)

High Performance Computing PPP

- The EC Communication "**High-Performance Computing: Europe's place in a global race**", adopted 15 Feb 2012, describes an ambitious strategy for HPC, combining three elements:

FET

- a) Computer Science: towards exascale High Performance Computing;

RI

- b) providing access to the best supercomputing facilities and services for both industry and academia;

FET
+RI

- c) achieving excellence in HPC applications;

Complemented with training, education and skills development in HPC

FET Proactive (except HPC) – Thematic call

Collaborative research

A set of thematic initiatives on promising emerging research themes.

- Fixed deadline calls
- 15 page proposals
- 1 step submission, 1 stage evaluation
- 3 evaluation criteria

Instrument

- Research and Innovation Actions

FET evaluation

- FET-Open & FET-Pro-active (except HPC)
Specific evaluation procedure
- FET-Flagship
Specific evaluation procedure

Critères d'évaluation – Actions de Recherche et d'Innovation

- **S/T quality** weight 60%, threshold 4/5
 - Clarity of targeted breakthrough and its relevance towards a long-term vision.
 - Novelty and foundational character.
 - Specific contribution to progress in science and technology.
 - Quality and effectiveness of the S/T methodology and workplan.
- **Impact** weight 20%, threshold 3,5/5
 - Appropriateness of measures envisaged towards getting a transformational impact of the results on science, technology and/or society.
 - Appropriateness of measures envisaged for the dissemination and/or use of project results.
- **Implementation** weight 20%, threshold 3/5
 - Quality of management.
 - Quality of the participants and of the consortium as a whole.
 - Appropriate allocation and justification of resources (person-months, equipment, budget).

Critères d'évaluation – Actions de Coordination

- **Excellence** weight 40%, threshold 3/5
- **Impact** weight 40%, threshold 3/5
- **Implementation** weight 20%, threshold 3/5

FET Flagships

FET Flagships are ambitious, large-scale, long-term, science-driven, goal-oriented, roadmap-based research initiatives, which are expected to:

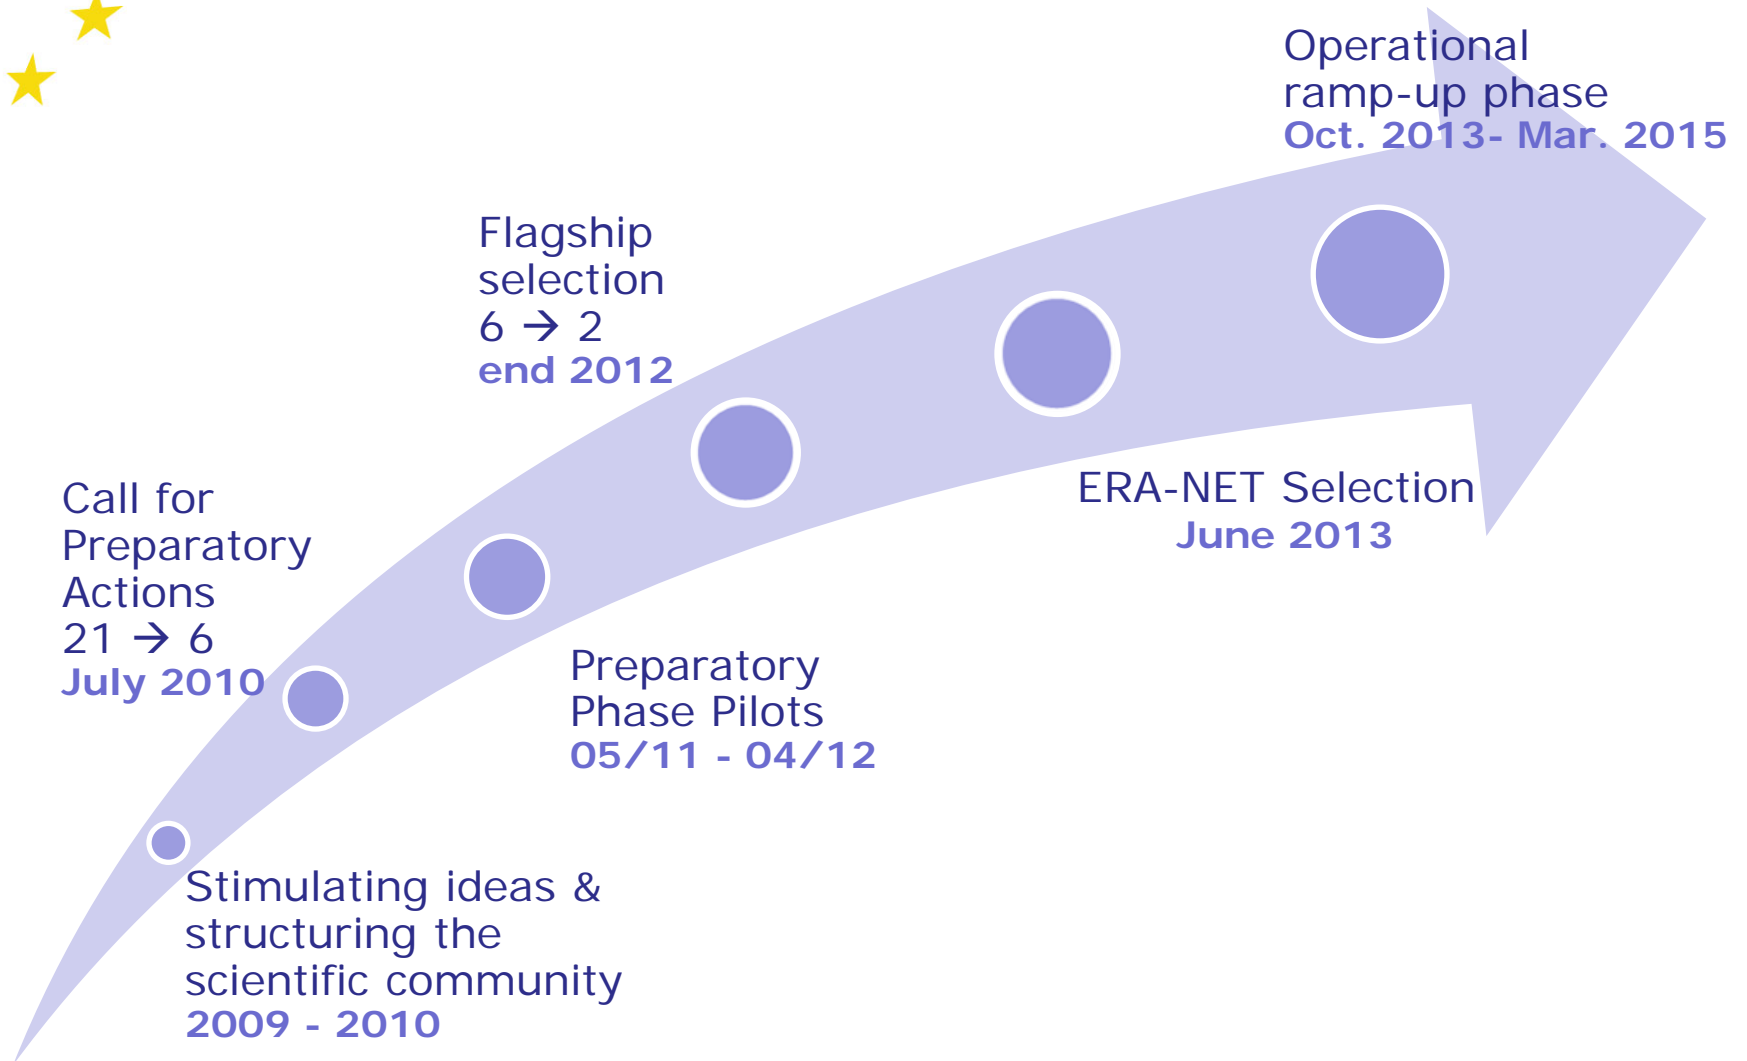

- provide a strong S&T basis for future technological innovation and substantial benefits for society
- help overcome fragmentation and increase the impact of European research and innovation efforts

and which will require:

- cooperation among a range of scientific communities/disciplines, with industries and with the involvement of representatives from the civil society
- a long-term commitment of all key stakeholders sharing a common scientific vision and under a strong leadership
- a joint effort of EU and national programmes to provide a large financial support (~ 100 M€/year) over a long period (~10 years)

Le processus de sélection des FET Flagships

FET Flagship: Graphene

Graphene, is a 2D material , a single layer of carbon atoms, stronger than diamond, yet lightweight and flexible and an exceptional electricity conductor.

The Graphene Flagship will bring graphene, and related 2D materials, from academic labs to industry, manufacturing and society.

Examples of products:

- ✓ **electronic paper**
- ✓ **bendable smartphones**
- ✓ **enhanced solar cells and batteries**
- ✓ **lighter and more energy efficient airplanes**

On the longer term, graphene is expected to give rise to new computers and revolutionary medical applications such as artificial retinas.

*Artistic impression of a corrugated graphene sheet
Credit: Jannik Meyer*

Graphene - Appel ouvert

- total de 9 M€ (~20% de l'IP-CSA) sera distribué au travers d'appels compétitifs
- Seules les équipes d'entités non partenaires au consortium sont éligibles (indépendamment de leur part dans le projet initial)! Celles-ci deviendront ensuite membre de plein droit au GA
- 20 à 30 équipes seront sélectionnées
- 12 sujets sont identifiés:
 - *A- Materials, B- Health & environment, C- Fundamental science, D- High-frequency electronics, E- Optoelectronics, F- Spintronics, G- Sensors, H- Flexible electronics, I- Energy applications, J- Nanocomposites, K- Production*
- Chaque sujet bénéficiera d'environ 700 k€ (2 projets attendus...au maximum), sur la base des taux FP7
- Les projets peuvent être monopartenaires
- L'évaluation sera menée par des experts indépendants sur la base des critères CE traditionnels
- Publication le 25 novembre 2013
- Clôture le 5 février 2014
- Résultats pour juin 2014 au plus tard

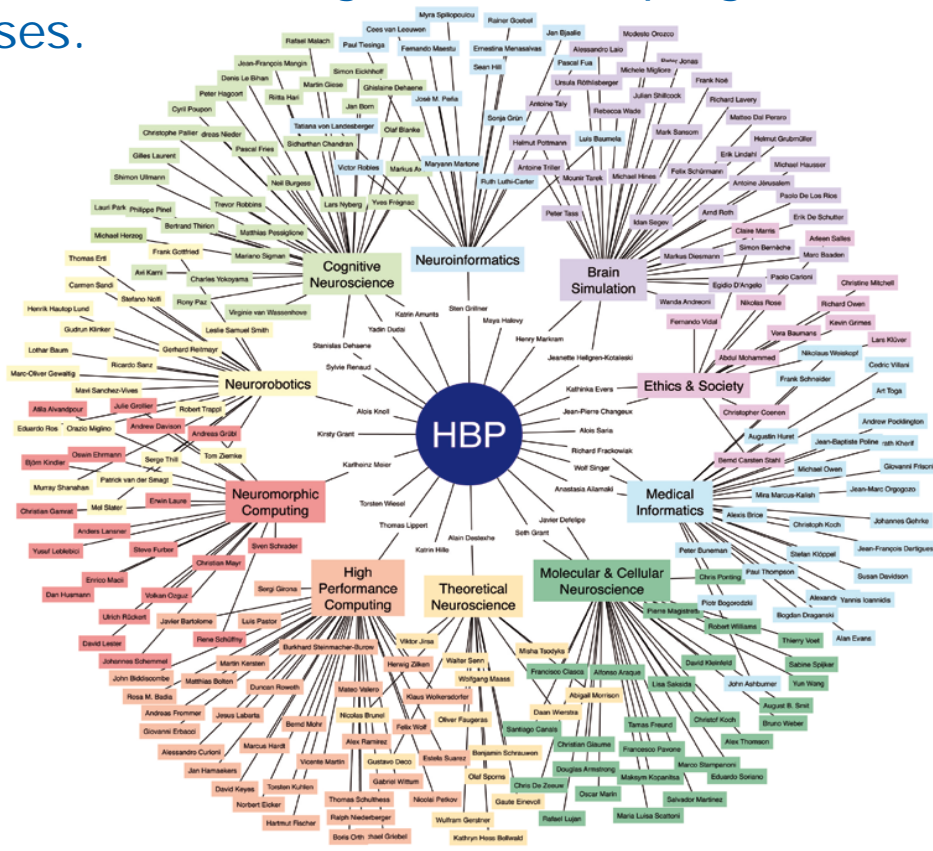

FET Flagship: Human Brain Project

HBP will create the world's largest experimental facility for developing the most detailed models of the brain (from genes to mind), for studying how the human brain works and ultimately for simulating and developing personalised treatment of brain diseases.

This research lays the scientific and technical foundation for medical progress: identifying new drug targets and treatment, in response to the urgent need to combat brain diseases and their associated costs to society.

HBP will also produce brain-inspired 'neuromorphic' computing systems that could drastically reduce power-consumption for super-computers and enhance robots.

HBP – Appel terminé

- ~9 M€
- Lancement le 1 octobre 2013
- Clôture le 6 novembre 2013
- Résultats en février 2014
- Contenu
 1. *Human and mouse neural channelomics and receptomics (937 k€)*
 2. *Genotype to phenotype mapping of the mouse brain (937 k€)*
 3. *Identifying, gathering and organizing multimodal human and nonhuman neuroscience data (937 k€)*
 4. *Cognitive architectures (750 k€)*
 5. *Novel methods for rule-based clustering of medical data (937 k€)*
 6. *Neural configurations for neuromorphic computing systems (581 k€)*
 7. *Virtual robotic environments, agents, sensory & motor systems (2,5 M€)*
 8. *Theory of multiscale circuits (768 k€)*

L'ERANET FLAG-ERA

- Objectif: coordonner les actions des agences nationales ou régionales en lien avec les Flagships
- Activités
 - Etablir un inventaire des actions
 - Analyser la couverture (redondances ou manques éventuels)
 - Potentiellement lancer des appels conjoints

Budget prévisionnel

□ WP 2014 – 2015 – Budget global de 453 M€

- FET Open: 80 M€/an
- FET Proactive
 - GSS: 10 M€ en 2014
 - Knowing, doing, being: 15 M€ en 2014
 - Quantum simulation: 8 M€ en 2014, 2 M€ en 2015
 - HPC: 97,4 M€ en 2014
- Flagships:
 - HBP, 89 M€ en 2015
 - Graphene, 89 M€ en 2015

Calendrier

- Adoption du WP le 12 novembre
- Lancement des appels : 11 décembre
- Clôture 2014
 - FET-OPEN : 30/09/2014
 - FET-PROACTIVE : 01/04/2014 mais FETHPC : 25/11/2014

PCN – Technologies Futures et Emergentes (FET)

Frédéric Laurent, représentant Comité de programme, MESR

Fabienne Ragache, experte Comité de programme, DGCIS

Coordination – Martine Garnier-Rizet

Martine Knibiehler, mission interdisciplinarité

Subbarao Bassava

Muriel Maurice, Chargé de projets Europe et ANR

Nicolas Lecompte, chargé d'affaires Europe

Catherine Gilles-Pascaud, chargée de mission

Nacer Boubenna, chargé de mission pôle relations européennes
